New Cars & Trucks Buyer's Guide

Features recommendations and ratings on hundreds of small, medium, and large-sized cars based on quality, economy, performance, and comfort standards, with judgments on crash protection, and assessments of available options

Drivers buy more wheels and tires for their cars and trucks than any other aftermarket accessory. This book is a comprehensive source for wheel and tire information. Whether you want to know how your

wheels and tires actually work and how they affect vehicle performance, or whether you just need advice as to what best suits your vehicle, this book provides the information you are looking for. This book covers daily use and competition cars and trucks, including off-road, circle track, drag, autocross, rally, and show vehicles. Beginning with a chapter on vehicle dynamics, with explanations of center of gravity, slip angle, yaw, roll, and pitch. Author Richard Newton then moves on to general information about tires and wheels--from materials and construction to use and maintenance. He also explores how this general information applies to specific types of vehicles, using pertinent examples throughout.

Caribbean/Latin America Profile

Almost every advertising, promotion, or marketing communications textbook is based on

an inside-out approach, focusing on what the marketer wants to communicate to customers and prospects. This text takes a different view - that the marketer and the customer build the ongoing brand value together. Rather than the marketer trying to 'sell', the role of the marketer is to help customer buy. To do that, a customer view is vital and customer insight is essential. Customer insights allow the marketer to understand which audiences are important for a product, what delivery forms are appropriate, and what type of content is beneficial. "Building Customer-Brand Relationships" is themed around the four key elements marketing communicators use in developing programs - audiences, brands, delivery, and content - but provides an innovative approach to marketing communications in the 'push-pull' marketplace that combines traditional outbound communications (advertising, sales promotion, direct marketing, and PR) with the inbound or 'pull' media of Internet, mobile communications, social networks, and more. Its 'customer-centric' media planning approach covers media decision before dealing with creative development, and emphasizes measurement and accountability. The text's concepts have been used successfully around the world, and can be adapted and adjusted to any type of product or service.

FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations.

In this unputdownable true crime collection from New York Times bestselling author Ann Rule discover fascinating cases of the spouse, lover, family member, or helpful stranger whose lethal violent nature, though masterfully disguised, can and will kill. The author of *The Stranger Beside Me*

Me brings her brilliantly informed understanding of the sociopath to this riveting true crime collection. Featured here is the case of a Southern California family man who lured a beautiful flight attendant into a passionate and dangerous relationship. Other cases include that of the woman who masterminded her husband's murder to gain his inheritance...the monstrous sadist whose prison release damaged a presidential candidate's campaign and ended in a bitter double tragedy in a quiet neighborhood three thousand miles away...the shocking DNA link between a cold-blooded crime and a cold case...and inside the horrific case of the man who crossed an ocean and several countries to stalk the Eurasian beauty who had fled from him in desperation. Popular Science gives our readers the information and tools to improve their technology and world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
