The NFL is the most popular professional sports league in the United States. Its athletes

Acces PDF 2014

receive multimillion-dollar contracts and almost endless media attention. The league's most important game, the Super Bowl, is practically a national

holiday.

Making it to
the NFL,
however, is
not about the
promised land
of fame and
fortune.

Robert W.

Without

majority of
players are

Sports-Related Concussions in Youth: Improving the Science,

Changing the Culture reviews the science of sports-related concussions in youth from elementary school through young adulthood, as well as in military personnel and their dependents. This report recommends

Acces PDF 2014
Nfhs Football
Rules Test

actions that can be taken by a range of audiences - including research funding agencies, legislatures, state and school superintendents and athletic directors, military organizations, and equipment manufacturers, as well as youth who

participate in sports and their parents - to improve what is known about concussions and to reduce their occurrence. Sports-Related Concussions in Youth finds that while some studies provide useful information, much

remains unknown about the extent of concussions in youth; how to diagnose, manage, and prevent concussions; and the short- and long-term consequences of concussions as well as repetitive head impacts that do not result in concussion

symptoms. The culture of sports negatively influences athletes' self-reporting of concussion symptoms and their adherence to return-to-play guidance. Athletes, their teammates, and, in some cases, coaches and parents may not

fully appreciate the health threats posed by concussions. Similarly, military recruits are immersed in a culture that includes devotion to duty and service before self, and the critical nature of concussions may often go unheeded.

According to Sports-Related Concussions in Youth, if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered, then the

culture in which these athletes perform and compete will become much safer. Improving understanding of the extent, causes, effects, and prevention of sports-related concussions is vitally important for the health and

well-being of youth athletes. The findings and recommendations in this report set a direction for research to reach this goal.

As ongoing high-profile drug scandals have demonstrated, sports organisations

Steven J.
