Each country study will include valuable metrics for gauging the advance or decline of Islamism. In places where Islamists are not in power, these include year-on-year comparisons of the number of terrorist attacks that have taken place, the level of popular support being received by radical religious organizations and political parties, and applicable government responses to these trends, if any. Abu Dhabi--an obscure Middle Eastern principality that happens to be the richest city in the world. This book tells the story of Abu Dhabi's ambitions to transform itself from a sleepy sheikhdom into a thriving international metropolis and a hub of business and leisure. It traces Abu Dhabi's boom years from 2009 to 2011 from the perspective of a Westerner working for the Urban Planning Council, the government agency that planned and coordinated all of the massive development activity. Castles in the Sand explores the drastic changes in Abu Dhabi's built environment, where entire islands are forested with skyscrapers and billions of dollars in infrastructure are spent on a whim--while recounting the disorienting experience of an outsider encountering a society in

from you in terms of motivation, values, beliefs, and outlook. With the spread of mobile augmented reality, it has become very difficult to consider digital space and physical space independently. In this book, the authors identify and discuss the state 'Second Offline' which refers to a real-world environment whose elements are augmented by virtual information and one in which individuals are constantly referring to the online world. "Second Offline" is observed across a wide range of social contexts and the relationship between superimposed digital online information and physical offline information is increasingly important. This book analyses the cooperative relationship between online and offline and also examines situations where there may be a

conflict between these realities. Furthermore, the authors discuss the possibility that in addition to influencing the physical space, the digital world actually causes some of the physical world to be lost. Offering a discussion of the implications of a post-mobile society in which second offline is widespread, this edited collection will be of interest to students, scholars and practitioners working in sociology, mobile media and cultural studies more generally.

While most of Asia's major cities are increasingly homogenized by rapid economic growth and cultural globalization, Rangoon, which is Burma's former capital and largest city, still bears the imprint of a unique and often turbulent history. It is the site of the Shwedagon Pagoda, a focus of Buddhist pilgrimage and devotion since the early second millennium C.E. that continues to play a major role in national life. In 1852, the British occupied Rangoon and made it their colonial capital, building a modern port and administrative center based on western designs. It became the capital of independent Burma in 1948, but in 2005 the State Peace and Development Council military junta established a new, heavily fortified capital at Naypyidaw, 320 kilometers north of the old capital. A major motive for

the capital relocation was the regime's desire to put distance between itself and Rangoon's historically restive population. Reacting to the huge anti-government demonstrations of "Democracy Summer" in 1988, the new military regime used massive violence to pacify the city and sought to transform it in line with its supreme goal of state security. However, the "Saffron Revolution" of September 2007 showed that Rangoon's traditions of resistance reaching back to the colonial era are still very much alive. Each year American executives make nearly eight million trips overseas for international business. In the process, they leave billions of dollars on the negotiation table.
