Determine the new prices for any firearm you want to sell or trade, whether its condition is in box, excellent, or good. With new introductory materials that every gun collector and potential buyer should read, this book is the ultimate guide to purchasing classic or discontinued firearms. No matter what kind of modern firearm you own or collect, the Gun Trader's Guide should remain close at hand. Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

In the mid-1960s, the Soviet Union unveiled the BMP, the first true infantry fighting vehicle. A revolutionary design, the BMP marked a significant departure from the traditional armoured personnel carrier, with a lower silhouette and heavier armament than rival APCs. One of the most fearsome light-armoured vehicles of its day, it caused great consternation on the other side of the Iron Curtain as the Americans scrambled to design a machine to rival the BMP. The result was the M2/M3 Bradley. These Cold War icons first clashed – not on the plains of Europe, but in southern Iraq during the Gulf War of 1991. Featuring specially commissioned full-colour artwork, this is the absorbing story of the origins, development and combat performance of the BMP and Bradley, culminating in the bloody battles of the Gulf War.

Text by David Isby. Colour plates by Ron Volstad. This book examines Soviet forces in Afghanistan. The origins and conduct of the war and the operational organisation of Soviet forces are discussed. Afghan resistance and weaponry is also examined. A comprehensive study of both sides in the Afghan war.

Ballistik ist jene Wissenschaft, welche die gesamten physikalischen Erscheinungen und die Bewegung eines geworfenen Körpers (Geschosses) behandelt. Sie wird je nach dem Umfeld, worin Geschossbewegung stattfindet, in verschiedene Teilgebiete unterteilt: Die Innenballistik beschäftigt sich mit den Vorgängen rund um die Beschleunigung des Geschosses innerhalb der Waffe. Ihre Zuständigkeit endet, sobald das Geschoss die Waffe verlässt. Auch unmittelbar danach kann die Waffe den - schossflug noch beeinträchtigen, z. B. durch Schwingungen oder nachfolgende Gase, welche zunächst das Geschoss überholen. Für diesen Teil der Geschossbewegung ist die sogenannte Abgangballistik zuständig. Hat das Geschoss den Einflussbereich der Waffe vollständig verlassen, so folgt es während seines Fluges bis zum Ziel den Gesetzmäßigkeiten der Außenballistik. In dieses Gebiet fällt die Bestimmung

des örtlichen und zeitlichen Verlaufs der Flugbahn, der Geschwindigkeit und der Eigenbewegung des Geschosses um seinen Schwerpunkt, unter Berücksichtigung aller auf das Geschoss einwirkenden Kräfte. Trifft das Geschoss auf ein Objekt auf und dringt in dieses ein, so werden die dabei auftretenden Gesetzmäßigkeiten durch die Endballistik untersucht. Handelt es sich beim getroffenen Objekt um einen Menschen oder ein Tier, bezeichnet man das betreffende Wissensgebiet mit Wundballistik.

Gun Trader's Guide, Thirty-Fifth Edition

Ancient travellers called the Caucasus the mountain of languages. Greeks, Persians, Romans, Goths, Arabs, Mongols and Turks have all passed through the region; poets and artists have been inspired by its rugged beauty and yet its history is a tragic one - for centuries it has been ravaged by virtually continuous war. Every 50 years, it seems, Russia attempts to take control of this hugely strategic part of the world - sandwiched as it is between Iran, Turkey and Russia and crossed by some of the most valuable oil pipelines in the world. The latest conflict to sweep across the area began when Vladimir Putin invaded Chechnya in 1999. Thousands of Russian soldiers and thousands more Chechens - both rebels and civilians - died and Chechnya's towns and cities were bombed beyond recognition. Sebastian Smith travelled to Chechnya during this period. A mixture of travelogue, history and war journalism, Allah's Mountains tells the story of the conflict between this nation of mountain tribes and the might of the Russian army. A moving example of how history can be written. Smith's account of the historical background to the conflict reads like a novel, but better, because it also has the intimacy and immediacy of an eyewitness account. He has given us a memorable, well-researched account of a peculiarly horrible war. - Literary Review This is a riveting book, written with almost seamless elegance. - International Affairs A comprehensive investigation of modern terrorism and the global terrorist environment. The book uses a multidisciplinary approach and discusses an array of global case studies from the ideology of ISIS, to the Orlando Mass Shooting, and State-Sponsored Terrorism in Iran and Pakistan, to provide readers with an in-depth account of international terrorist violence, from its emergence through to events taking place today. Key topics examined in the book include: The Causes of Terrorism Terrorist Violence and the Role of the Media Cyberterrorism Gender-Selective Terrorism The Lone Wolf Theory The Future of Terrorism The book is supported by online resources for students and lecturers, including: PowerPoint slides for each chapter, a sample syllabus, a list of films and documentaries related to key concepts in the book, and access to free SAGE journal articles. Suitable reading for students studying Terrorism, International Terrorism, and Counter-terrorism.

The author specializes in complex RICO litigation with emphasis on application of the Pinkerton Doctrine in RICO conspiracy. James N. Gross, Esq., of Philadelphia, PA., and the author represent plaintiffs in the RICO conspiracy case of Smith v. Berg, 247 F.3d 532 (3rd Cir. 2001). A member of both the RICO Law Reporter Advisory Board and the Civil RICO Report Advisory Board, the author publishes extensively upon RICO conspiracy law and the Pinkerton Doctrine, as well as addressing RICO aiding and abetting issues. Willamette University College of Law, JD 1976, New York University Graduate Tax Program, 1981. Former staff attorney, 1978 House Select Committee on Assassinations. The author's avocation includes researching and analyzing the role of the American intelligence community and the events culminating in the attack upon the American embassy in Saigon, South Vietnam, on 31 January 1968, and the attacks during the 1968 Tet Offensive at Khe Sanh, Hue City, and the My Lai Massacre, 16 March 1968.

War in Peace

A Comprehensive, Fully Illustrated Reference for Modern Rifles with Current Market Values

The author of Guns of the Special Forces 2001-2015 presents a comprehensive overview of 21st century military guns used by small armies around the world. Soldiers in today's modern armies have access to ever more advanced infantry weapons; lighter, more compact and more accurate than anything seen in the last century. These include combat pistols, personal assault rifles, submachine guns, sniper rifles, shotguns, light machine guns and squad automatic weapons. Infantry Small Arms of the 21st Century features all these weapons and more, examining each in exhaustive detail. The author draws on the operational combat experience of the users in war zones such as Iraq, Afghanistan and Ukraine. As well as

assessing and comparing the potency of different nations weapon systems, the book looks to the future demands of the infantry man.

"This path-breaking study is about how ordinary people are gaining the means to be extraordinarily lethal. States are also concentrating their technological power, but their gains lag behind a shift in relative capacity that is already disrupting the role of conventional armed forces. The dispersal of emerging technologies such as roboics, cyber weapons, 3-D printing, autonomous systems, and various forms of artificial intelligence is widening popular access to unprecedented destructive power. Based on hard lessons from previous waves of lethal technology such as dynamite and the assault rifle, the book explains what the future may hold and how we should respond"-
