We could call this book "Special Operations Recon Mission Impossible." A small group of highly trained, resourceful US Special Forces (SF) men is asked to go in teams behind the enemy lines to gather intelligence on the North Vietnamese Army units that had infiltrated through Laos and Cambodia down the Ho Chi Minh trails to their secret bases inside the Cambodian border west of South Vietnam. The covert reconnaissance teams, of only two or three SF men with four or five experienced indigenous mercenaries each, were tasked to go into enemy

target areas by foot or helicopter insertion. They could be 15 kilometers beyond any other friendly forces, with no artillery support. In sterile uniforms - with no insignia or identification, if they were killed or captured, their government would deny their military connection. The enemy had placed a price on their heads and had spies in their Top Secret headquarters known as SOG. SOG had three identical recon ground units along the border areas. This book tells the history of Command and Control Detachment South (CCS). The CCS volunteer warriors and its Air Partners - the Army and Air Force helicopter transport and gunship crews who lived and fought together and sometimes died together. This is the first published history of CCS as compiled by its last living commander, some forty years after they were disbanded. It tells of the struggles and intrigue involved in SOG's development as the modern-day legacy of our modern Special Operations Commands. Forbidden to tell of their experiences for over twenty years; their After Action Reports destroyed even before they were declassified - surviving veterans team together to tell how Recon men wounded averaged 100 percent; and SOG became the most highly decorated unit in Vietnam and all were awarded the Presidential Unit Citation.

\*\*\*\*\*Relaunched Version\*\*\*\*\* The aliens arrived on Earth, and transformed our lives with just seven words; "You will change, or you will die." These visitors were fearful that humans would eventually export our way of resolving conflicts to our intergalactic neighbors. Hoping to prevent this, they sealed off the entire planet in a massive isolation device. But confining us in this way has doomed us to almost certain death. Between the human race and our unwelcome guests stands an extraordinary family, who may be able to save humanity from this fate. Lark Wright, their youngest member, has incredible abilities. But this information has been kept hidden by the family, as they fear she may be taken from them and exploited. This secret is revealed, however when Lark uses one of her astounding gifts to gain an audience with our other-worldly jailers. Her heartfelt plea on behalf of humankind secures for us a compromise, which has astonishing implications. Will humans survive this concession by the aliens? Will they triumph over their new normal? Agent Svetlana Simonov of the government's top-secret Omega Force is sent to Florida to find out if a former secret agent killed his family, then himself, or if something more sinister has happened. In Florida she comes across the beautiful

Katrina Luvesky, leader of the deadly Moscow Cartel. Svetlana must infiltrate Katrina's network and stop it before the United States finds itself in an international drug war. Passion and violence erupt as Svetlana and Katrina do battle.

When a dark force that has traveled around the universe since the dawn of time arrives on the Earth, no one could anticipate that the evil presence of evil will change itself into an evil sorcerer. Arming himself with dragons, ogres, giants and other creatures that follow in obedience to his will, he unleashes his will on the people and many will lose their lives. For every action - there is an equal in strength reaction, and where there is evil, goodness must be present in opposition. Knowing that a sign is given to save the world from evil, a young wizard appears from the same darkness and his name is Gradon Duncan. Leaving his family, the young wizard, only ten years old, will meet a new friend and confront the forces of evil together. They will seek out the Phoenix and their search will introduce them to many of the mythological creatures of the past. Only their faith will see them succeed or fail to save mankind from evil.

This book considers videogames as spaces of political philosophy. Emerging from a negotiation between designers, player and computer, they prompt us to rethink life in common and imagine alternatives to the status quo. Several case studies on science fictional videogames from Japan serve to demonstrate this potential for

This book looks closely at the endings of narrative digital games, examining their ways of concluding the processes of both storytelling and play in order to gain insight into what they are and how we identify them in different media. While narrative digital games share many representational strategies for signalling their upcoming end with more traditional narrative media – such as novels or movies – they also show many forms of endings that often differ from our conventional understanding of conclusion and closure. From vast game worlds that remain open for play after a story's finale, to multiple endings that are often hailed as a means for players to create their own stories, to the potentially tragic endings of failure and "game over", digital games question the traditional singularity and finality of endings. Using a broad range of examples, this book delves deeply into these and other forms and their functions, both to reveal the closural specificities of the ludonarrative hybrid that digital games are, as well as to find the core elements that characterise endings in any medium. It examines how these endings make themselves known to players and raises the question of how well-established

clausal conventions blend with play and a player's effort to achieve a goal. As an interdisciplinary study that draws on game studies as much as on transmedial narratology, *Forms and Functions of Endings in Narrative Digital Games* is suited for scholars and students of digital games as well as for narratologists yet to become familiar with this medium. Tomas Raffle, a strong willed and determined Navy commander is the leader of the Omega Force, the United States Government's top-secret military strike team. A team that operates outside the rules laid down by things like the Geneva Convention. Their latest mission takes them into Iran in search of two nuclear missiles. But when the mission fails and a majority of his men are killed in the raid, Raffle suspects betrayal as the evidence starts pointing towards someone in Washington D.C. Maybe even the President himself. Meanwhile, the President receives mysterious calls threatening to release the Gulf War Syndrome on the capitol, unless he publicly admits to a government cover-up concerning the origin of the terrible disease. To make matters worse, the caller knows about the Omega Force and its mission, though only a select few people are supposed to be aware of its existence. Now with only 6 days to come forward with the information and the President's daughter taken ill, apparently suffering from a more deadly version of the syndrome, Raffle has to help the President uncover the identity of the blackmailer, while he is hunting the person responsible for the slaughter of his team in the desert.

Rick Moody offers a brilliant trio of stories, spanning glittering golf courses, a stifling office and a harrowing dystopia. "The Albertine Notes" presents a cataclysmic vision of New York City after the levelling of fifty square blocks of Manhattan by a suitcase bomb. Albertine, the 'street

name for the buzz of a lifetime', is a mind-altering drug through which survivors seek solace in the past. K and K concerns lonely young Ellie Knight-Cameron, office manager at an insurance agency, where the office suggestion box is yielding unpleasant messages that escalate to a scary pitch. And at the centre of The Omega Force is a buffoonish former government official in rocky recovery. Dr 'Jamie' Van Deusen is determined to protect his habitat - its golf courses (and Bloody Marys) and pizza places (and beers) from 'dark-complected' foreign nationals. In the tradition of Guns, Germs, and Steel, Leebaert tells the stories of small forces that have triumphed over vastly larger ones and changed the course of history -- from the Trojan Horse to Al Qaeda.
