In the 19th century, in Calcutta, a land of opportunity where the forging of an empire is being built on scientific advances, wars and painful diseases. After an unhappy life, a young Irish man, victim of poverty and chance, will see his life change when he becomes the new Dr. Miller, a prestigious physician who will fight to keep his "secret" and become a respectable member of the so-called "White City". When he meets the dazzling Mrs. Wilson, a wealthy lady married to an opium-trafficking crook, his whole life will turn upside down until he goes crazy with desire. When she finally manages to overcome all the obstacles, she faces the harsh reality and a wild nature that threatens to devour them all.

***This book is devoted to a systems-theoretical presentation of the main results of applying the systemic yoyo model and relevant analytical tools to the topics of money and financial institutions. The author presents the main concepts and results of the subject matter in the language of systems science, which has in the past century prompted revolutionary applications of systems research in various subfields of traditional disciplines. This volume applies a brand new logic of reasoning to some of the unsettled problems in the area of money and banking. Due to the particular systemic approach employed, the reader will be able to see how different economic activities are implicitly related to each other and how financial decisions are holistically made in reference to seemingly unrelated events. That is, the learning of this particular subject matter takes place at a different, more elevated***

***level, from which, among others, economies are respectively seen as both closed and open systems; their interactions emulate those of rotational pools of fluids. This book can be used as a textbook for researchers and graduate students in economics, finance, systems science, and mathematical / systems modeling. It will also be useful as a reference book for applied economists and various policy makers.***

The adventures of Laura Ingalls and her family continue as they leave their little house on the prairie and travel in their covered wagon to Minnesota. Here they settle in a little house made of sod beside the banks of beautiful Plum Creek. Soon Pa builds a wonderful new little house with real glass windows and a hinged door. Laura and her sister Mary go to school, help with the chores, and fish in the creek. At night everyone listens to the merry music of Pa's fiddle. Misfortunes come in the form of a grasshopper plague and a terrible blizzard, but the pioneer family works hard together to overcome these troubles. And so continues Laura Ingalls Wilder's beloved story of a pioneer girl and her family. The nine Little House books have been cherished by generations of readers as both a unique glimpse into America's frontier past and a heartwarming, unforgettable story.

Damiano Bruno Silipo In the 1990s the Italian banking system underwent profound normative, institutional and structural changes. The Law on Banking (1993) and that on Finance (1998) instituted the legal framework for a far-reaching overhaul of the Italian banking and financial system: significant relaxation of entry barriers, the liberalization of branching, the privatization of the Italian banks, and a massive process of mergers and acquisitions. Following the Bank of Italy's liberalization of branching in 1990, in 10 years the number of bank branches increased by 20% while in the rest of Europe it declined. Over the decade the average number of banks doing business in a province rose from 27 to 31, 100 mergers (324 operations) and acquisitions (137) revolutionized the Italian banking industry, reducing the overall number of Italian banks by 50%. To a significant extent this concentration represented take-overs of troubled Southern banks by Central and Northern ones. As a result of this process (plus a rise in banking productivity and a fall in costs), the spread between short-term lending and deposit rates fell from 7 percentage points in 1999 to 4 points in 2009. And despite an increase in concentration in a number of local credit markets, the interest-rate differential between the dominant and other banks generally narrowed.
