

## **Advanced Level Physics Michael Nelkon**

This book is about a requirements specification for a Holodeck at a proof of concept level. In it I introduce optical functions for an optical processor and describe how they map to a subset of the Risc-V open instruction set. I describe how parallelism could be achieved. I then describe a possible layered approach to an optical processor motherboard for the datacenter and for a personal Holodeck. I describe Volumetrics in brief and show how its evolution to Holodeck volumetrics could be done with bend light technology and the possibility of solidness to touch. I describe in detail the architecture of a Holodeck covering several approaches to Holodecks from static scene to scrolling scene to multi-user same complex to networked multi-user Holodecks.

Solutions and Test Papers for Advanced Level Physics

Forgotten Corners of the World but We Have Life and Space

This book completes a scientific life trilogy of books following on from the *Hows* (i.e. skills) and the *Whys* is now the *Whats* of a scientific life. Starting with just what is science, then on to what is physics, what is chemistry and what is biology the book discusses career situations in terms of types of obstacles faced. There follow examples of what science has achieved as well as plans and opportunities. The contexts for science are dependencies of science on mathematics, how science cuts across disciplines, and the importance of engineering and computer software. What science is as a process is that it is distinctly successful in avoiding or dealing with failures. Most recently a radical change in what is science is the merger of the International Council of Scientific Unions and the International Social Sciences Council. Key Features: Dissects what is science and its contexts Provides wide ranging case studies of science and discovery based directly on the author's many decades in science The author has outstanding experience in mentoring and career development, and also in outreach activities for the public and students of all ages The world of science today involves a merger of 'the sciences' and the 'social sciences'

A new civilisation focused on correcting the destructive errors of the present civilisation needs to be cultivated and implemented in the third world. This new civilisation will entail preserving current moral and environmental levels existing in the third world. Unity Elias Yang, also the author of *A Global State*. vLike the Third Estate in France, the Third World has nothing, but wants to be something, for both have been exploited. Alfred Sauvy, *French Demographer* 1952. No new light has been thrown on the reason why poor countries are poor and rich countries are rich. Paul Samuelson, 1976 *Does the Third World Point to the Future?* Trevor Burrowes, Author 1990. The black race shall prevail. Mouammar Kadhafi, President of Libya, July 1999. They go naked as the day they were born; the women as the men. We Christians said they were remarkably beautiful men and women. This beauty was moral as well as physical. . . . They are the most pleasant and peaceful people in the world. Christopher Columbus, Spanish Explorer comments on American Indians 1492 Born on 20th May 1974, Unity Elias Yang is the first African member of the Board of the Organization Vote World Parliament (VWP) in Quebec-Canada. He is also the Author of *A Global State through Democratic Federal World Government*.
