African Development Making Sense Of The Issues And Actors

This open access book analyses the development problems of sub-Saharan Africa (SSA) from the eyes of a Korean diplomat with knowledge of the economic growth Korea has experienced in recent decades. The author argues that Africa's development challenges are not due to a lack of resources but a lack of management, presenting an alternative to

the traditional view that Africa's problems are caused by a lack of leadership. In exploring an approach based on mind-set and nation-building, rather than unity – which tends to promote individual or party interests rather than the broader country or national interests – the author suggests new solutions for SSA's economic growth, inspired by Korea's successful economic growth model much of which is focused on industrialisation. This book will be of interest to researchers, policymakers, NGOs and governmental bodies in economics, development and politics studying Africa's

This book uses Nigeria's Afri-capitalist and South Africa's Ubuntu Business models as case studies that reconcile the tension between Africa Rising and Pan African economics, presenting their convergence as Africa's viable Third Way route to global development. In presenting Afri-capitalism and Ubuntu Business as national, business sector manifestations of a "new" Pan Africanism, the author explores Africa's "culturalist" path in engaging the international political economy. Development policy making in this regard, is an art of setting out strategies to build resilience and take advantage of disruptions or change in whatever format: political, economic, health, diplomatic, demographic or even environmental and climatic. The book discusses nine major disruptions in Africa's socio-economic life and the limits imposed by the rhetoric in development policy: exclusion and social inequality, environmental degradation and

Jahrzehnten von billigen Darlehen, nicht rückzahlbaren Krediten, Schuldenerlassen, bilateraler und multilateraler Hilfe steht Afrika schlimmer da als je zuvor. Mit Dead Aid hat Dambisa Moyo ein provokatives Plädoyer gegen Entwicklungshilfe und für Afrika geschrieben. Knapp, faktenreich und zwingend legt sie ihre Argumente dar. Entwicklungshilfe, im Sinne von Geld-Transfers zwischen Regierungen, macht abhängig. Sie zementiert die bestehenden Gegebenheiten, fördert Korruption und finanziert sogar Kriege. Sie zerstört jeden Anreiz, gut zu wirtschaften und die Volkswirtschaft anzukurbeln. Entwicklungshilfe zu beziehen ist einfacher, als ein Land zu sanieren. Im Gegensatz zu Bono und Bob Geldoff weiß Moyo, wovon sie spricht. Die in Sambia geborene und

In den USA und Großbritannien löste Dead Aid eine hitzige Debatte aus. Es stand mehrere Wochen auf der New York Times Bestsellerliste und wurde vom Sunday Herald zum Buch des Jahres gewählt. understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were

addressed in different times and places. An exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical "episodes" that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates the many ways in which societies have influenced each other

During the second half of the twentieth century, African states shifted away from state-led development strategies, and are now moving towards a strategy of regional economic integration. In this book, Landry Signé explores the key drivers of African policy and economic transformation, proposing a preeminent explanation of policy innovations in Africa through the examination of postcolonial strategies for economic development. Scholars and practitioners in fields as varied as development studies, political science and public

First studying why, how and when institutional or policy change occurs in Africa, Signé explores the role of international, regional and national actors in making African economic development strategies from 1960 to date, highlighting the economic transformations of the twenty-first century.

After over fifty-years of Canadian engagement with Africa, no comprehensive literature exists on Canada's security policy in Africa and relations towards Africa's regional organizations. The literature on Canada's foreign policy in Africa to date has largely focused on development assistance. For the first time, Edward Akuffo combines historical and contemporary material on Canada's development and security policy while analyzing the linkage between these sets of

The book makes an important contribution to the debate on Canada's foreign policy generally, and on Africa's approach to peace, security and development, while shedding light on a new theoretical lens - non-imperial internationalism - to understand Canada's foreign policy. The author captures an emerging trend of cooperation on peace, security, and development between the Canadian government and African regional organizations in the twenty-first century. The resulting book is a valuable addition to the literature on

It then demonstrates how neo-

colonialism remains an impediment to genuine empirical sovereignty and poverty reduction in Africa today. It does this through examination of corporate interventions; Western aid-giving; the emergence of 'new' donors such as China; EU-Africa trade regimes; the securitisation of development; and the UN Sustainable Development Goals. Throughout the chapters, it becomes clear that the current challenges of African development cannot be solely pinned on so-called neo-patrimonial elites. Instead it becomes imperative to fully acknowledge, and interrogate, corporate and donor

An important feature of Ghanaian tertiary education is the foundational African Studies Programme which was initiated in the early 1960s. Unfortunately hardly any readers exist which bring together a body of knowledge on the themes, issues and debates which inform and animate research and teaching in African Studies particularly on the African continent. This becomes even more important when we consider the need for knowledge on Africa that is not Eurocentric or sensationalised, but driven from internal understandings of life and prospects in Africa. Dominant representations and perceptions of Africa usually depict a

Rather than buying into external representations of Africa, with its 'lacks' and aspirations for Western modernities, we insist that African scholars in particular should be in the forefront of promoting understanding of the pluri-lingual, overlapping, and dense reality of life and developments on the continent, to produce relevant and usable knowledge. Continuing and renewed interest in Africa's resources, including the land mass, economy, minerals, visual arts and performance cultures, as well as bio-medical knowledge and products, by old and new geopolitical players, obliges African scholars to transcend disciplinary boundaries and to work with each other to advance knowledge and uses of those resources in the inter-

This fourth edition has been completely revised and focuses on the dynamism and diversity of today's Africa. The latest volume emphasizes contemporary culture—civil and social issues, art, religion, and the political scene—and provides an overview of significant themes that bear on Africa's place in the world. Orthodox strategies for socio-economic development have failed spectacularly in Southern Africa. Neither the developmental state nor neoliberal reform seems able to provide a solution to Africa's problems. In Africa's Development Impasse, Stefan Andreasson analyses this failure and explores the potential for post-development alternatives.

Examining the post-independence trajectories of Botswana, Zimbabwe and South Africa, the book shows three different examples of this failure to overcome a debilitating colonial legacy. Andreasson then argues that it is now time to resuscitate post-development theory's challenge to conventional development. In doing this, he claims, we face the enormous challenge of translating post-development into actual politics for a socially and politically sustainable future and using it as a dialogue about what the aims and aspirations of post-colonial societies might become. This important fusion of theory with empirical case studies will be essential reading for students of development politics and Africa.

For many in the west, the mention of Africa immediately conjures up images of safaris, ferocious animals, sparsely dressed "tribesmen," and impenetrable jungles. Newspaper headlines rarely touch on Africa, but when they do, they often mention authoritarian rule, corruption, genocide, devastating illnesses, or civil war. Advertising, movies, amusement parks, cartoons, and many other corners of society all convey strong mental images of the continent that together form a collective consciousness. Few think to question these perceptions or how they came to be so deeply lodged in western minds. Mistaking Africa looks at the historical evolution of this mind-set and examines the role that popular media plays in its creation. The authors address the most prevalent myths and preconceptions and demonstrate how

these prevent a true understanding of the enormously diverse peoples and cultures of Africa. Updated throughout, the fifth edition considers images of Africa from across the world and provides new analysis of what Africans are doing themselves to rewrite the stories of their continent, particularly through social and digital media. Mistaking Africa is an important book for African studies courses and for anyone interested in unraveling misperceptions about the continent. From a multi-dimensional and interdisciplinary standpoint, this book challenges the teleological and unidirectional notions of development embodied in the idea of modernisation or 'progress' and offers a critique of the tendency to consider Africa as a basket case, which often gives the Western 'self' an undeserving privilege and superiority over the African 'other'. Mostly authored by emerging African scholars, this 16-chapter volume addresses the historical application of

development projects in Africa and their modern impact in economic, political, cultural, social, and infrastructural contexts, among others. The book, therefore, unearths development dynamics in specific African countries, examines the continent's external relations, rethinks predominant ideas on development, and engages in critical examination of concepts and practices that have maintained hegemonic positions in the discussions on Africa's development. Its uniqueness lies in the ability to bring these several voices and themes together into a concise conception of both the challenges and possibilities of Africa's sustainable development. The book targets both the academic and policy worlds in Africa and around the world, as well as ordinary members of the public who seek to broaden their theoretical and empirical understanding on the changing dynamics on the African continent.

As pillars of the post-1945 international economic system the Regional and Sub-Regional Development Banks (RSDBs) have long been considered mini-World Banks, reiterating the policy approach of the largest official multilateral development lender in the world. The main objective of the collection is to identify what role the RSDBs play in global economic governance and why. This edited collection draws together cutting edge original research on these understudied institutions. In the burgeoning sub-field of global economic governance as well as the broader study of international organisations (IOs), too often the focus remains on the

World Bank and the International Monetary Fund (IMF). Second-order IOs, such as the RSDBs, receive much less attention despite their longevity and regional importance. This volume corrects this oversight by bringing together methodologically diverse research on the RSDBs that interrogates the role and impact of these organisations in global economic governance. The book investigates: the African Development Bank (AfDB); the Asian Development Bank (AsDB); the Inter-American Development Bank (IDB), and the European Bank for Reconstruction and Development (EBRD) and select sub-regional development banks in comparison to the World Bank Group. This work will be of great interest to students and scholars of IPE, IR and Development Studies.
