“Digital Gothic focuses fascinatingly on the pre-soporific roots of the group and their place in a cool electronic lineage which traces right up to Detroit techno.”—Mojo “A stimulating companion to the group’s music.”—The Wire Paul Stump picks his way through a minefield of releases, assessing Tangerine Dream’s long career with a highly critical eye, and for the very first time places their mammoth output within an ordered perspective.

Film Phenomenology and Adaptation: Sensuous Elaboration argues that in order to make sense of film adaptation, we must first apprehend their sensual form. Across its chapters, this book brings the philosophy and research methodology of phenomenology into contact with adaptation studies, examining how vision, hearing, touch, and the structures of the embodied imagination and memory thicken and make tangible an adaptation's source. In doing so, this book not only conceives adaptation as an intertextual layering of source material and adaptation, but also an intersubjective and textural experience that includes the materiality of the body.

Bestsellerautor Bruno Preisendörfers nächste Zeitreise: Auf der Spur der Philosophie der Alltagsgegenstände und dem, was sie mit uns machen. 1963, als der Erstklässler Bruno Preisendörfer aufgeregt seinen ersten Schulweg antrat, hing an seinem Schulranzen noch ein Wischlappchen für seine Schiefertafel, gerechnet wurde mit Stift und Rechenschieber, Musik hörte man im Radio oder auf LP und nur 14% der Bevölkerung hatten ein Telefon - die Preisendörfers gehörten nicht dazu, einen Fernseher gab es bei ihnen daheim auch nicht und auch keine Schreibmaschine, mit der man z. B. das Manuskript zu diesem Buch hätte schreiben können. Mit einer Mischung aus Irritation, Faszination und verschmitztem Staunen lässt Preisendörfer die rasante Entwicklung Revue passieren, die seinem persönlichen Alltag im Laufe weniger Jahrzehnte widerfuhr. Manchmal mit ein wenig Nostalgie, manchmal fasziniert, immer aber mit Neugier und dem Bewusstsein, dass auch jede Zukunft nur allzu bald ihre Vergangenheit hat. Preisendörfer wäre dabei nicht Preisendörfer, beleuchtete er nicht mit wachem Blick und stilistischer Raffinesse, was die jeweiligen Kulturtechniken mit ihren Benutzern machten und wie sie sich auf das jeweilige Sozialgefüge auswirkten - wenn sich die

gesamte Familie um einen Fernseher versammelt, lebt man anders, als wenn jeder ein Tablet hat; mit physischen LPs war Musik ö ren etwas anderes als mit Streamen; und wenn jeder ein Handy hat, entwickelt sich auch kein erbitterter Kampf um das einzige Telefon mehr.

A history of the modern blockbuster traces the progression of big summer films from the mid-1970s to the present, discussing how such factors as large Hollywood budgets and technological advances contributed to the industry's rise, in a volume that includes discussions with such figures as Steven Spielberg and George Lucas. 30,000 first printing.

Celluloid Symphonies is a unique sourcebook of writings on music for film, bringing together fifty-three critical documents, many previously inaccessible. It includes essays by those who created the music—Max Steiner, Erich Korngold, Jerry Goldsmith, Elmer Bernstein and Howard Shore—and outlines the major trends, aesthetic choices, technological innovations, and commercial pressures that have shaped the relationship between music and film from 1896 to the present. Julie Hubbert's introductory essays offer a stimulating overview of film history as well as critical context for the close study of these primary documents. In identifying documents that form a written and aesthetic history for film music, Celluloid Symphonies provides an astonishing resource for both film and music scholars and for students.

Tony Bramwell's remarkable life with The Beatles began in a post-war Liverpool suburb where he was childhood friends with John, Paul and George. By the time he unexpectedly ran into George Harrison on top of a bus, Tony was well into a life story absolutely unlike any other. At Apple Record's insistence, Tony stayed with The Beatles for every step of their meteoric rise. His story has been sought for over thirty years, and here it is, detailing with an insider's shrewd eye the incomparable success and inevitable failure of the Apple empire; Brian Epstein's frolics; Ken Kessy's Merry Pranksters; Phil Spector's eccentric behaviour; as well as never-heard-before stories about Yoko Ono. 'Magical Mystery Tours' reveals fresh insights that have never been published in any of the 800 plus books already on the market, including compelling details of the early recordings and songwriting and Yoko's pursuit of John and her growing influence over The Beatles' lives. From the first number one to the last and from scraps of song lyrics to the discovery of the famous Mr Kite circus poster, this is a broad ranging account of the swinging sixties and the decade's most successful rock band.

Finally the encyclopedia incorporates entries on films by other directors who have influenced Scott's approach to his work as a director or producer. Each entry is followed by a bibliography of published sources, both in print and online, making this the most comprehensive reference on Scott's body of work.

This book provides a comprehensive and lively introduction to the major trends in film scoring from the silent era to the present day, focussing not only on dominant Hollywood practices but also offering an international perspective by including case studies of the national cinemas of the UK, France, India, Italy, Japan and the early Soviet Union. The book balances wide-ranging overviews of film genres, modes of production and critical reception with detailed non-technical descriptions of the interaction between image track and soundtrack in representative individual films. In addition to the central focus on narrative cinema, separate sections are also devoted to music in documentary and animated films, film musicals and the uses of popular and classical music in the cinema. The author analyses the varying technological and aesthetic issues that have shaped the history of film music, and concludes with an account of the modern film composer's working practices.

Peter Larsen traces the history of music in film and discusses central theoretical questions concerning its narrative and psychological functions. He looks in depth at film classics such as Howard Hawks's 'The Big Sleep' and Hitchcock's 'North by Northwest' as well as later blockbusters such as 'Star Wars' and 'Bladerunner'.

This book interrogates the meeting point between Afrofuturism and Black Sound Studies. Whereas Afrofuturism is often understood primarily in relation to science fiction and speculative fiction, it can also be examined from a sonic perspective. The sounds of Afrofuturism are deeply embedded in the speculative - demonstrated in mythmaking - in frameworks for songs and compositions, in the personas of the

artists, and in how the sounds are produced. In highlighting the place of music within the lived experiences of African Americans, the author analyses how the perspectives of Black Sound Studies complement and overlap with the discussion of sonic Afrofuturism. Focusing upon blackness, technology, and sound, this unique text offers key insights in how music partakes in imagining and constructing the future. This innovative volume will appeal to students and scholars of sound studies, musicology and African American studies.

Contradicting assumptions that disco albums are shallow and packed with filler, Donna Summer's double album Once Upon A Time stands out as a piece that delivers on its promise of an immaculately crafted journey from start to finish. A new interpretation of the Cinderella story, it is set in the then contemporary world of New York disco and takes the listener on a journey from urban isolation and deep despair to joy and vindication, all filtered through the mind of its naïve and fantasy-prone protagonist. As well as charting the production of the album within the legendary Munich Machine in Germany, this book digs deep into the album's rich themes and subtexts. Approaching the book from inventive angles, the four essays within the book act as a prism connecting the reader to the classical aspirations of Eurodisco, the history of the black fairy tale and a queer knowledge that reads Summer's Cinderella tale in some surprising ways.

Excerpt: The Blade Runner soundtrack was composed by Vangelis for Ridley Scott's 1982 film Blade Runner. It is mostly a dark, melodic combination of classical composition and synthesizers which mirrors the futuristic film noir envisioned by Scott. Several different albums have been made, some including tracks omitted from the final cut, or new tracks in the same style. An orchestral rendition of part of the soundtrack was released in 1982 by the New American Orchestra. However, the original soundtrack album (1994) features vocal contributions from Demis Roussos and the sax solo by Dick Morrissey on "Love Theme." The track "Memories of Green" from Vangelis' 1980 album See You Later was also included. A new release made in 2007 includes a disc of new music inspired by the film. The film also features "Ogi No Mato" ("The Folding Fan as a Target" on Traditional Vocal and Instrumental Music from Nonesuch Records) by the Japanese group Ensemble Nipponia, and harpist Gail Laughton's "Pompeii 76 A.D." (from Harps of the Ancient Temples). The original soundtrack release was delayed for over a decade, until 1994, despite the music being well-received by fans and critically acclaimed-nominated in 1983 for a... A groundbreaking approach to sound in sci-fi films offers new ways of

construing both sonic innovation and science fiction cinema Including original readings of classics like The Day the Earth Stood Still, 2001: A Space Odyssey, Star Wars, and Blade Runner, The Sound of Things to Come delivers a comprehensive history of sound in science fiction cinema. Approaching movies as sound objects that combine cinematic apparatus and consciousness, Trace Reddell presents a new theory of sonic innovation in the science fiction film. Reddell assembles a staggering array of movies from sixty years of film history—including classics, blockbusters, B-movies, and documentaries from the United States, Britain, France, Germany, Japan, and the Soviet Union—all in service to his powerful conception of sound making as a speculative activity in its own right. Reddell recasts debates about noise and music, while arguing that sound in the science fiction film provides a medium for alien, unknown, and posthuman sound objects that transform what and how we hear. Avoiding genre criticism's tendency to obsess over utopias, The Sound of Things to Come draws on film theory, sound studies, and philosophies of technology to advance conversations about the avant-garde, while also opening up opportunities to examine cinematic sounds beyond the screen. This book of essays looks at the multitude of texts and influences which converge in Ridley Scott's film Blade Runner, especially the film's relationship to its source novel, Philip K. Dick's Do Androids Dream of Electric Sheep? The film's implications as a thought experiment provide a starting point for important thinking about the moral issues implicit in a hypertechnological society. Yet its importance in the history of science fiction and science fiction film rests equally on its mythically and psychologically resonant creation of compelling characters and an exciting story within a credible science fiction setting. These essays consider political, moral and technological issues raised by the film, as well as literary, filmic, technical and aesthetic questions. Contributors discuss the film's psychological and mythic patterns, important political issues and the roots of the film in Paradise Lost, Frankenstein, detective fiction, and previous science fiction cinema.

Michel Chion is renowned for his explorations of the significance of frequently overlooked elements of cinema, particularly the role of sound. In this inventive and inviting book, Chion considers how cinema has deployed music. He shows how music and film not only complement but also transform each other. The first section of the book examines film music in historical perspective, and the second section addresses the theoretical implications of the crossover between art forms. Chion discusses a vast variety of films across eras, genres, and continents, embracing all the different genres of music that filmmakers have used to tell their stories. Beginning with live accompaniment of silent films in early movie houses, the book analyzes Al Jolson's performance in The Jazz Singer, the zither in The Third Man, Godard's patchwork sound editing, the synthesizer welcoming the flying saucer in Close Encounters of the Third Kind, and the Kinshasa orchestra in Félicité, among many more. Chion considers both original scores and incorporation of preexisting works, including the use and reuse of particular composers across cinematic traditions, the introduction of popular music such as jazz and rock, and directors' attraction to atonal and dissonant music as well as musique concrète, of which he is a composer. Wide-ranging and original, Music in Cinema offers a welcoming overview for students and general readers as well as refreshingly new and valuable perspectives for film scholars.

This book considers the greatest film scores produced over a span of more than 80 years. Each entry includes background information about the film, biographical information about the composer, a concise analysis of the score, and a summary of the score's impact both within the film it accompanies, but also on cinematic history.

A study of the classic science fiction film 'Blade Runner' (1982) and movies based on the fiction of Philip K. Dick (1928-1982).

The 1992 release of the "Director's Cut" only confirmed what the international film cognoscenti have known all along: Ridley Scott's Blade Runner, based on Philip K. Dick's brilliant and troubling SF novel Do Androids Dream of Electric Sheep, still rules as the most visually dense, thematically challenging, and influential SF film ever made. Future Noir is the story of that triumph. The making of Blade Runner was a seven-year odyssey that would test the stamina and the imagination of writers, producers, special effects wizards, and the most innovative art directors and set designers in the industry. A fascinating look at the ever-shifting interface between commerce and the art that is modern Hollywood, Future Noir is the intense, intimate, anything-but-glamorous inside account of how the work of SF's most uncompromising author was transformed into a critical sensation, a commercial success, and a cult classic.

Sampling has become a predominantly digitalized practice. It was popularized with the rise of Rap and Hip-Hop, as well as ambient music scenes, but it has a history stretching back to the earliest days of sound recording and experimental music making around the world. Digital networks allow artists to sample music across national borders and cultural traditions with relative ease, prompting questions around not only fair use, copyright, and freedom of expression, but also cultural appropriation and "copywrongs." Based on archival research and musical analysis, alongside conversations with artists and their own public reflections, *Sampling Politics* provides ways to listen more closely and hear (again) music making.
