Mission Nemo simply must succeed. If the crew of the Super Small Miniaturized Nano-like Operations Wessel S. S. Minnow fails to destroy the inoperable anti-capitalist coagulum lodged in Morris Moore's progressive brain, how will General De Klein's Federal Department of Antidotes operatives at SUCFACE Mission Control find out if Leftylometaxoline (aka LeftX) really works? Would this usher in the final stage of the liberal clerisy's clandestine collectivist conspiracy to abolish our few remaining individual freedoms forever? That would not please President Thump one microscopic little bit. Join Major Miles Stone and his disturbingly alluring crew on their miniaturized mission through the left and lefter hemispheres of the progressive brain. Their fantastic voyage is a race against time that takes them through such redoubtable regions as the Clinton Vortex, the Cte Guevara Gray Area and the Obama Trauma Center itself. Here they bravely confront such anatomical monstrosities as the fantasist frontalis, the hyperbolthalamus and the dreaded pious aspiration node. Their progressive brain journey only gets progressively worse as they are repeatedly attacked by repulsive swarms of nanny neurons, doomsday dendrons, robin hoodlums and the formidable radical egalitarian bacterium. If not for the courage of the fearless crew, and their deadly arsenal of passing phasers, millennial mindset missiles, moral busybudy antibodies and Condescendum(R), the Minnow would be lost. The Minnow would be lost. The tension never stops building during this thrilling tale of adventure, danger, suspense and romance. And lust. Will Captain Hanna Grenada's irresistible animal magnetism finally seduce the Major into experiencing something vaguely resembling basic human emotion? Can the all too communicative HAL 9999 super computer and his annoying eye drones really be trusted to operate the ship? And will the Minnow's political corrector deflectors and smug shields hold, allowing Stone and his crew to reach their target and ignite the liberal bombast bomb in time? I could tell you but that would ruin the suspense. Not your everyday dystopian science-fiction erotic horror political thriller, this bombastic bombshell of a book knows no shame when it comes to overwhelming you with its serious silliness, wanton wackiness and forthright, flat-out fare. Purchase it now before it is too late or something. Soon to be made into a major motion picture. Or maybe it has been already. There is also time travel involved here, after all.

Your kids love Brain Quest, now it's baby's turn! Announcing a brand-new Brain Quest® program for the very youngest learners. Imbued with the "It's Fun to Be Smart!®" core value that's made Brain Quest America's beloved #1 educational brand with more than 57 million copies in print, the My First Brain Quest board book program has two formats—9x9 first words books that build foundational vocabulary and 7x7 books that introduce foundational early learning concepts—both with Brain Quest's signature question-and-answer approach. My First Brain Quest: First Words: Science Around Us is a 9" x 9" board book that introduces baby to more than 100 science-related vocabulary words in the context of their world—at the playground, in the backyard, at the doctor's office, at the beach. In addition to labeled illustrated objects presented in context each spread has questions to encourage dialogue between caregiver and child, and captions that provide age-appropriate context for foundational science concepts: Plants grow from seeds. Ice is hard. Fire is hot. Smart, colorful, grounded in educational principles, reviewed by a panel of early learning experts, and defined by the signature question-and-answer format, these books are Brain Quest at its best: not only making learning fun, but encouraging the kind of interaction between children and caregivers that makes early learning meaningful.
