This highly illuminating book marks a significant stage in our growing understanding of how the development of national traditions of economic thought has been affected by both internal and external factors. The expert contributors set an explicit agenda for the study of the dissemination of economic ideas across four centuries, acknowledging that the history of dissemination is also a history of the flux of economic beliefs,

Topics explored include systems of political economy, European and American interactions, the diffusion of economic ideas in South-Eastern Europe and beyond, and the exchange of ideas between Japan and the rest of the world. This book will prove a fascinating and stimulating read for scholars and researchers in the field of economics generally, and more specifically in heterodox economics, the history of economic thought and economic theory.

However, few today seem to recollect that it was precisely the British who were the first to promulgate the political culture which inspired the European Union's construction—democracy and federalism—and the first who tried to realise, in June 1940, a European federation on the basis of an Anglo-French union. This volume traces the fundamental stages of the European unification process, placing it in relation to the wider process of world economic and political integration. In

The universal historical significance of the European Revolution lies in its exportability—as for the other great European revolutions—and, therefore, its potential as progressively extensible to all the states of the planet. Wie der Zweite Weltkrieg die Menschheit bis heute prägt

During the First World War, mass media achieved an enormous and continuously growing importance in all belligerent countries. Newspaper, illustrated magazines, comics, pamphlets, and instant books, fictional works, photography, and the new-born "theater of imagery", the cinema, were crucial in order to create a heroic vision of the events, to mobilize and maintain the consensus on the war. But their role was pivotal also in creating the image of the war's end and finally, together with a widespread, new literary genre, the war memoirs, to shape the collective memory of the

conflict for the next generations. Even before November 1918, the media raised high expectations for a multifaceted peace: a new global order, the beginning of a peaceful era, the occasion for a regenerating apocalypse. Likewise, in the following decades, particularly war literature and cinema were pivotal to reverse the icon of the Great War as an epic crusade and a glorious chapter of the national history and to create the hegemonic image of a senseless carnage. The Mediatization of War and Peace focalizes on the central role played by mass media in the tortuous transition to the post-war period as well as on the profound disenchantment generated by their prophecies.

The European Union celebrated its 60th anniversary in 2017, but celebrations were muted by Brexit and the growing sense of a crisis of identity. However, as this seminal work shows, the history and ambition of the European Union are considerable. Written by key stakeholders who, between them, acted as architects, adjudicators and arbitrators of the project, it presents the definitive history of the first two generations of the European Union. This book revisits the birth and consolidation of the great project of a united Europe and the political, institutional, judicial and economical

The period between 1917 and 1957, starting with the birth of the USSR and the American intervention in the First World War and ending with the Treaty of Rome, is of the utmost importance for contextualizing and understanding the intellectual origins of the European Community. During this time of 'crisis,' many contemporaries, especially intellectuals, felt they faced a momentous decision which could bring about a radically different future. The understanding of what Europe was

and what it should be was questioned in a profound way, forcing Europeans to react. The idea of a specifically European unity finally became, at least for some, a feasible project, not only to avoid another war but to avoid the destruction of the idea of European unity. This volume reassesses the relationship between ideas of Europe and the European project and reconsiders the impact of long and short-term political transformations on assumptions about the continent's scope, nature, role and significance.

June, a few hours before the French Government opted for the capitulation, Churchill made, on behalf of the British Government, an offer of "indissoluble union." When a sceptical Churchill put forward to the British Cabinet the text of the declaration drafted by Jean Monnet, Sir Arthur Salter, and Robert Vansittart, he was surprised at the amount of support it received. The Cabinet adopted the document with some minor amendments, and de Gaulle, who saw it as a means of keeping France in the war, telephoned Reynaud with the proposal for an "indissoluble union" with "joint organs of defence, foreign, financial and economic policies," a

The spirit of capitulation, embodied in Weygand and Pétain prevailed, and France submitted herself to the German will, for the second time in seven years. After the Munich crisis, Great Britain had to face the danger of another European war, with the inevitable loss of the Empire, and it was at this point that the coalition first began to favour the application of the federalist principle to Anglo-French relations. This study principally examines the first eighteen months of the Federal Union during which time it was able to raise itself to the attention of the general public, and the political class, the heir of the League of Nations Union. This characterization of inter-war thought is scrutinized through ten detailed studies of such writers as Norma

about because of WWII—simultaneously one of the most catastrophic and most innovative events in history. It killed millions and eradicated empires, creating the idea of human rights, and giving birth to the UN. It was because of the war that penicillin was first mass-produced, computers were developed, and rockets first sent to the edge of space. The war created new philosophies, new ways of living, new architecture: this was the era of Le Corbusier, Simone de Beauvoir and Chairman Mao. But amidst the waves of revolution and idealism there were also fears of globalization, a dread of the atom bomb, and an unexpressed longing for a past forever gone. It undermines the myth that concentration camps were established in Italy only after the creation of the Republic of Salò and the Nazi occupation of Italy's northern regions in 1943, and questions the persistent and traditional image of Italians as brava gente (good people), showing how Fascism made extensive use of the camps (even in

The radical changes taking place in the international scene during the late 1980s have presented the European Communities with important new challenges. She calls for a new form of ethical accountability that takes "Life" as the subject, not the object, of enquiry. This ethics is presented as a fundamental reconfiguration of our being in the world and it calls for more conceptual creativity in the production of worldviews that can better enable us to behave ethically in a technologically and globally mediated world. This book explores the role of Mediterranean imaginaries in one of the preeminent tropes of Italian history: the formation or 'making of' Italians. While previous scholarship on the construction of Italian identity has often focused too narrowly on the territorial notion of the nation-state, and over-identified Italy with its capital, Rome, this book highlights the importance of the Mediterranean Sea to the development of Italian collective imaginaries. From this perspective, this book re-interprets key historical processes and actors in the history of modern Italy, and thereby challenges
