Cross And Tapper On Evidence

This unique two-volume work seeks for the first time to address in a comprehensive fashion both "substantive" and "procedural" aspects of international criminal law as applied by international and national courts. Substantive topics include individual criminal responsibility, genocide, war crimes, crimes against humanity, crimes against UN and associated personnel, core crimes and defenses, while procedural aspects include the right of suspects and accused, the protection of victims and witnesses, and pre-trial, trial and appeal procedures and practices. In addressing these subjects the work focuses on the practical application of the relevant norms and provides both

Additionally, because national courts still have a vital role to play in the application of these norms, attention is given to prosecutions in national jurisdictions. With this work the editors seek both to assist the reader in understanding these important concepts as well as to provide the background documentation such that the reader can conduct his or her own research and

Das Vertrauensverhältnis zwischen Anwalt und Mandant ist unverzichtbar für jede wirksame anwaltliche Interessenwahrnehmung. Denn soll der Anwalt seinen Mandanten im Zivilprozess wirksam vertreten, bedarf er aller dafür notwendigen Informationen, die ihm in erster Linie der Mandant zugänglich machen muss. Das wird dieser freilich nur tun, wenn er darauf vertrauen kann, dass sein Anwalt die offenbarten Informationen weder missbrauchen wird noch zu ihrer Offenlegung ohne Weiteres gezwungen werden kann. Dem Anwalt muss daher das Recht zustehen, diese Informationen

Die Möglichkeit von Beinahetreffern bei Reihengentests verleiht Grund und Reichweite strafprozessualer Angehörigenprivilegierungen eine neue Relevanz. Causation is a foundational concept in tort law: in claims for compensation, a claimant must demonstrate that the defendant was a cause of the injury suffered in order for compensation to be awarded. well as the exceptional departures from these rules which each system has made. Exploring the different approaches to uncertainty over causation in tort law, Sandy Steel defends the justifiability of some of these exceptions, and categorises and examines the kinds of exceptional rules suggested by the case law and literature. Critically engaged with both the theoretical literature and current legal doctrine, this book will be of interest to private law scholars, judges and legal practitioners.

meet the community interest in prosecuting serious crime and maintaining workable criminal sanctions. This book investigates the supposed justifications for limitation of the presumption of innocence. It does so through a comprehensive analysis of the history, rationale and scope of the presumption of innocence. It is argued that the values underlying the presumption of innocence are of such fundamental importance to individual liberty that they cannot be sacrificed on the

altar of community interest. In particular, it is argued that a test of 'proportionality', which seeks to weigh individual rights against the community interest, is inappropriate in the context of the presumption of innocence and that courts ought instead to focus on whether an impugned measure threatens the values which the presumption is designed to protect. English summary: Maximilian Seibl deals with the burden of proof in respect to German and European private international law provisions, more specifically with the question as to how a non liquet situation can be solved and what consequences for the parties of a lawsuit result from this. The problem derives from the structure of private international law provisions which establish a connection between the facts of the case and the applicable law by the so-called connecting factor. In many cases one party claims

the existence of a certain connecting factor pointing to a specific legal system whereas the other party denies this connection and alleges the applicability of another legal system based on the same connecting factor; if it remains uncertain whether the connecting factor actually points to the one or the other legal system, it is indispensable to find a solution. As the connecting factor usually features an open character - i.e. it can establish a connection with every existing legal system on principle - whereas substantive law provisions only distinguish

between the existence and the non-existence of certain facts, the conventional principles of the burden of proof must be modified. The book offers a differentiated solution to this problem that keeps the connection with those principles but also takes the private international law and the respective procedural implications into consideration. The Oxford Handbook of Criminal Process surveys the topics and issues in the field of criminal process, including the laws, institutions, and practices of the criminal justice administration. The process begins with arrests or with crime investigation such as searches for evidence. It continues through trial or some alternative form of adjudication such as plea bargaining that may lead to conviction and punishment, and it includes

post-conviction events such as appeals and various procedures for addressing miscarriages of justice. Across more than 40 chapters, this Handbook provides a descriptive overview of the subject sufficient to serve as a durable reference source, and more importantly to offer contemporary critical or analytical perspectives on those subjects by leading scholars in the field. Topics covered include history, procedure, investigation, prosecution, evidence, adjudication, and appeal. This book is a comparative study of the exclusion of

illegally gathered evidence in the criminal trial , which includes 15 country studies, a chapter on the European Court of Human Rights, and a comparative synthetic conclusion. No other book has undertaken such a broad comparative study of exclusionary rules, which have now become a world-wide phenomenon. The topic is one of the most controversial in criminal procedure law, because it reveals a constant tension between the criminal court's duty to ascertain the truth, on the one hand, and its duty to uphold important constitutional rights on the

other, most importantly, the privilege against self-incrimination and the right to privacy in one's home and one's private communications. Zur Gewährung umfassenden Rechtsschutzes bedarf es bei der Gestaltung von Verfahrensrecht eines Ausgleichs zwischen Formstrenge und Freiheit. Zivilprozessrecht zu sehen ist. International criminal justice has undergone rapid recent development. Since the establishment of the International Criminal Tribunal for the former Yugoslavia (ICTY) in 1993, and the International Criminal Tribunal for Rwanda (ICTR) in the following year, the field has changed beyond recognition. The traditional immunity of presidents or heads of government, prime ministers, and other functionaries acting in an official capacity no longer prevails; the doctrine of superior orders is inapplicable except, where appropriate, as in mitigation; and the gap between international armed conflict and non-international armed conflict has closed. More generally, the bridge has been

crossed between the irresponsibility of the state and the criminal responsibility of the individual. As a result, the traditional impunity of the state has practically gone. This book, by one of the former judges of the ICTY, ICTR, and the International Court of Justice, assesses some of the workings of the ICTY that have shaped these developments. In it, Judge Shahabuddeen provides an insightful overview of the nature of this criminal court, established on behalf of the whole of the international community. He reflects on its transformation into one of the leading fora for the growth of international criminal law first-hand, offering a unique perspective on the challenges it has faced.
