The troubles and ills of the church today can

Access Free Digestive System At Body Worlds

only be understood and healed when Christians begin to face up to their hidden alliances with the Corinthians of the first century and embrace both the Apostle's diagnosis and therapy offered in the epistle. This is the challenge of The Malady and Therapy of the Christian Body, a two-volume commentary by two leading theologians that presents the fruits of a reading strategy that deliberately reflects ecclesial commitment by "reading the Apostle over against ourselves." Sharing their discoveries about the way Paul deals with questions of factionalism, sexuality, legal conflict, idolatry, dress

codes, and eating habits, Brock and Wannenwetsch demonstrate how neither the malady nor the therapy that Paul describes conforms to dominant analyses of the malaise of the contemporary church, which tend to be as "organ centered" as modern medicine. The authors describe the way the Apostle engages in "feeling-into" the organic whole of the body in order to detect blockages to the healthy flow of powers by redirecting their vision to how God is working among them toward the "building up" of the Christian body. The book breaks new ground in crossing the traditional disciplinary boundaries

Re-imagining Exhibition Spaces and Practice

Controversy in Science Museums focuses on exhibitions that approach sensitive or controversial topics. With a keen sense of past and current practices, Pedretti and Navas Iannini examine and re-imagine how museums and science centres can create exhibitions that embrace criticality and visitor agency. Drawing on international

case studies and voices from visitors and museum professionals, as well as theoretical insights about scientific literacy and science communication, the authors explore the textured notion of controversy and the challenges and opportunities practitioners may encounter as they plan for and develop controversial science exhibitions. They assert that science museums can no longer serve as mere repositories for objects or sites for transmitting facts, but that they should also become spaces for conversations that are inclusive, critical, and socially responsible.
