The phenomenon of consumption has increasingly drawn attention from economists. While the 'sole purpose of production is consumption', as Adam Smith has claimed, economists have up to recently generally ignored the topic. This book brings together a range of different perspectives on the topic of consumption that will finally shed the necessary light on a largely neglected theme, such as Why is the consumption of symbolic goods different than that of goods that are not constitutive of individuals' identity? How does the consumption of symbolic goods affect social processes and economic phenomena? Will taking consumption (of symbolic goods) seriously impact economics itself? The book discusses these issues theoretically, and, through analyses of such cases as food, religion, fashion, empirically as well. It also discusses the possible role in the future of consumption. This book was previously published as a special issue of Review of Social Economy

Edexcel International GCSE (9-1) Mathematics Student Book, Third Edition

This book contains 70 ready-to-use mathematics lessons suitable for students aged 14-16. Some lessons offer alternative routes through the curriculum, such as practising indices by solving radical equations, while others concentrate on difficult ideas, like appreciating that not all mathematical relationships are linear. Each plan consists of a teacher's sheet, providing:

- the aims and objectives of the lesson
- a lesson starter, main phase, plenary and homework ideas, each with suggested timeframes
- guidance on how to adapt the activities to cater for students working at different levels; and
- online resources, including links to useful websites, material to display on the whiteboard and additional ideas. Each plan also includes a photocopyable or downloadable student task sheet that corresponds to the teacher's sheet. The lessons focus on problem solving and putting mathematics into context, and are an essential resource for any busy teacher of mathematics.
