A focused, teach-and-test approach to learning pharmacology Focus on Pharmacology: Essentials for Health Professionals helps students learn pharmacology by presenting small amounts of information and then offering opportunities for readers to apply what they've learned through a variety of exercises. Designed specifically for allied health students, early chapters lay the groundwork for learning pharmacology by introducing its history, legal and ethical principles, drug administration techniques, essential math, calculations, and medication errors. Subsequent chapters offer a structured presentation of the drugs intended to treat specific body systems and associated disorders.
