Seed Biology: Insects, and Seed Collection, Storage, Testing, and Certification, Volume III brings together a large body of important information on seed biology. The book describes seed collection, identification, storage, testing, and certification. It also considers insects that directly affect seeds, seed-producing organs, or seed-bearing structures of plants. Organized into six chapters, this volume begins by outlining man's dependency on seeds as source of food, fiber, spices, beverages, oils, vitamins, and drugs. Harmful effects of seeds are also mentioned. Separate chapters focus on seed development, dissemination, germination (including metabolism, environmental control, internal control, dormancy, and seed and seedling vigor), protection from diseases and insects, longevity, and deterioration. The book concludes with a discussion on the certification of field and tree seeds, the Organization for Economic Cooperation and Development certification schemes, and trends in seed certification. This book is a valuable source of information for seed producers and users as well as various groups of research biologists and teachers, including agronomists, plant anatomists, biochemists, ecologists, entomologists, foresters, horticulturists, plant pathologists, and plant physiologists.

The conference was held in Snowbird, Utah, October 1988, as a sequel to the Conference on Large Body Impacts held in 1981, also in Snowbird. This volume contains 58 peer-reviewed papers, arranged into sections that cover the major themes of the conference: catastrophic impacts, volcanism, and mass mortality; geological signatures of impacts; environmental effects of impacts; patterns of mass mortalities; and events and extinctions at the K/T boundary. Annotation copyrighted by Book News, Inc., Portland, OR

"An excellent introduction to the subject - I have not found a comparable text at this level." "Ron Fisher, Manchester Metropolitan University" " "Up to date and pitched at exactly the right level ... clear, interesting, well structured and easy to follow." "Norma D'Annunzio-Green, Napier University" Introducing Human Resource Management presents all the core HRM topics in a clear and lively style, exploring the latest developments in areas such as employment law and strategic HR as well as current applications of HR practice in the workplace. Including a wide range of activities, exercises, case studies and real life examples, this book really involves the reader, helping you gain a good understanding of the theory and of how it applies in practice. This edition includes: A thorough update on equality legislation, A new AWhat next?A feature to point you in the right direction if you want to deepen your knowledge of a topic, ADI if you knowA and APause for thoughtA boxes to get you thinking. Review and self-check questions (with answers) to test your understanding. A wealth of extra activities, quizzes and multiple choice tests online to help you

to check your knowledge and revise This book is ideal for a first course in human resource or personnel management at undergraduate or professional level, including courses that lead to a CIPD qualification. Margaret Foot and Caroline Hook have extensive work experience in the field of HRM. They are both Senior Lecturers in Human Resource Management at Huddersfield University Business School and are founding members of the CIPD Huddersfield Geographical Group.
