During the 1930s in the United States, the Works Progress Administration developed the Federal Writers' Project to support writers and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of individual guides to each of the states. Little-known authors—many of whom would later become celebrated literary figures—were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor. The WPA Guide to Delaware takes the reader on a journey through the coastal beauty of the state, from the Twelve-Mile Circle to the Nanticoke River. Although Delaware is the second smallest state in terms of area, the guide offers

Researchers have harnessed the flood of personal information and opinions shared on social media platforms in a variety of ways. People communicate not only what they imagine they are purposely sharing but also unintentionally leak information, which allows others to glimpse a sense of the subconscious and unconscious at a macro level. *Electronic Hive Minds on Social Media: Emerging Research and Opportunities* explores various research techniques to profile the electronic hive mind around social topics as expressed on various modalities of social media, from human, bot, and cyborg social media accounts, and proposes new research methods for harnessing public data from social media platforms. Highlighting topics such as knowledge sharing, swarm intelligence, and social psychology, this publication is designed for researchers, social psychologists, practitioners, and students in marketing, communications, mass media, and similar fields.

You have to put yourself out there if you want to make friends, do fun things and enjoy the ride. The average 18 year old is massively brainwashed. He has no idea of who he is in his true nature. He's trying to achieve success by society's formula which is college. Many kids go to college not even knowing that there are no jobs for many of the social science fields. They think that if the college offers it as a major, there must be a job waiting at the end. This is so stupid. Most 18 year-olds are self-centered. They think they're special because they're going to college then they go home and try to act scholarly like those nerdy professors they've been listening to for the past four months. What comes into your mind when you first hear about frugal living? You may be one of the many people who are likely to utter the words such as cheap lifestyle, miserable life, boring, or unhappy life. However, frugal living does not mean any of those words. It is not a miserable way of life because it is a choice in the first place because no one ever chooses to live a miserable life. More so, it is not boring considering the number of meaningful activities one could engage in when living in frugality. And more than that, frugal living does not mean having an unhappy life because it only means finding happiness beyond what money could offer. Surely, money allows you to buy the things you need, or maybe gain significant experiences. However, with the consumerist lifestyle that most people have, there is

a greater tendency to consume more, and spend for what is useless in life. Most people do not even realize that there is an abundance of ways to get to experience what they want in life. Instead, they go for expensive materials and buy those with big brand names, or get a luxury vacation package, and then show it off for others to see because it is what has been taught to them. When we talk about frugal living, we are dealing with a free lifestyle. It also means untying from a societally controlled lifestyle, which is the root of many of the pressing issues today. With the overly mindless consumption and consumerist lifestyle that most people have, we could say that the world desperately needs to learn the principles of frugal living. The proof of this frantic need for change is seen every day, when you see people drive to work in their single-occupied SUVs, whizz at the sight of beers and pack of cigarettes that minimum wage workers feast on during the day, or the group of youth holding their smartphones barely talking to each other. Regardless of your family's income levels, no one is immune to mindless consumption and no one is exempted from rejecting frugality. Most people fail to pursue frugal living, even at the micro and macro

levels. The United States economy is falling at the pit of debt, which is thrice the GNP of Japan, yet the country continues to spend more. And for the information of everybody, Japan has the world's third largest economy. That makes it so unbelievable how we confidently spend money, while also watching a handful of European countries worry about debt and everything combined. And it is not so surprising that this consumerist behavior reflects the spending behavior of most of its people. Fortunately, at present, there is a growing return to frugal living, given the condition and the aftermath of the Great Recession. The unemployment rates serve as a wake-up call for proper execution of our financial responsibilities.

adopt this simple, yet elegant way of experiencing life. Minimal living is not about doing without. It is about savouring everything greedily, while walking gently through your world. This book opens up an exciting doorway into getting the most out of your life, your way, with a 15-step guide to "going minimal." Packed with anecdotes and often humorous incidents, *The Last Drop of Living* is not only a pleasurable reading experience, but a roadmap to a fulfilling way to decrease the commonplace stresses in your life. Bonus chapters on yurts, barebones business, wildcrafting, energy simplicity, sustainability and minimalist vacation options provide extraordinary value beyond the invigorating discussions on minimalist strategies.

With the growth of the Internet, the personal finance industry has equally boomed, allowing individuals who previously had no control of their money to take the reins and start banking, investing, and controlling funds online without the need for pricey professional help. In 2002, the number of people investing online was around 20 million. In 2006, that number had ballooned to almost 55 million and the estimates for the 2007 fiscal year show that it has risen as much as 40 percent higher as more people realize the potential that online services provide. But for many people, the complexities of finance are still too much. For that reason, this book was written

Having this book is a helpful material on how to make our life simpler. As a good result, it forces improvements in almost all aspects of your life. Minimalism is finding freedom in your life to enjoy it. The objects you keep in your life are brought into it or held in your life with much more thought. Your things all have a purpose or reason. There are no strict rules to minimalism, it is what you make it, and it goes how far you want it to go. The point is to have fewer physical things weighing you down so you can make better decisions for your life overall. The concept that fewer items in your house will alter your mind and allow you to think clearer and remember better is hard to get across unless you've felt it personally. Minimalism focuses on simplifying your life to grant you the freedom to live it to the fullest, allowing you to focus on the things you want to do versus the things you have to do. Take on an additional project at work to make more money, take that cooking class you have always thought about, or maybe, just be able to relax in the comfort of your home and read a book.

Utopias fail. Utopias of one do not. They are perfect worlds. Yet their success comes at a cost. They are radically singular—and thus exclusive and inimitable. *Utopias of One* is a major new account of utopian writing. Joshua Kotin examines how eight writers—Henry David Thoreau, W. E. B. Du Bois, Osip and Nadezhda Mandel'shtam, Anna Akhmatova, Wallace

Stevens, Ezra Pound, and J. H.

Prynne—construct utopias of one within and against modernity's two large-scale attempts to harmonize individual and collective interests: liberalism and communism. The book begins in the United States between the buildup to the Civil War and the end of Jim Crow; continues in the Soviet Union between Stalinism and the late Soviet period; and concludes in England and the United States between World War I and the end of the Cold War. The book, in this way, captures how writers from disparate geopolitical contexts resist state and normative power to construct perfect worlds—for themselves alone. Utopias of One makes a vital contribution to debates about literature and politics, presenting innovative arguments about aesthetic difficulty, personal autonomy, and complicity and dissent. The book also models a new approach to transnational and comparative scholarship, combining original research in English and Russian to illuminate more than a century and a half of literary and political history.

In my opinion, unless you're a total introvert, agoraphobic, disabled or too lazy to leave the house, your best bet to buy most things you need is locally. Go to the Yellow Pages, read your local newspapers, drive around the shopping areas, go to local free ad websites and talk to people you know about what you need. I generally buy most of my stuff from the big department stores but if I need something like furniture, I'll check out the furniture stores on the poor side of the town because the prices for the same goods are often much cheaper than a store in the higher class part of town plus you can often haggle with the owner on a cash deal. By shopping on the poor side of town at supermarkets for food, you can often save several dollars on a load of groceries. Beyond that, I generally go to the thrift stores a few times a year to buy t-shirts, clothes and anything else that strikes my fancy as I look around.

A frugal living doesn't necessarily equate to poverty. In fact, a lot of billionaires practice frugal living. When you live a minimalism lifestyle, you free up your budget significantly

because you only need to focus on what is really needed. Switch to a minimalism lifestyle by first gathering information about it and determining whether such way of living is meant for you.

From the immensely popular blogger behind Little House Living comes a motivational homemaking book, inspired by Laura Ingalls Wilder's Little House on the Prairie, featuring creative, fun ways to live your life simply and frugally—perfect for fans of Ree Drummond's The Pioneer Woman. Shortly after getting married, Merissa Alink and her husband found themselves with nothing in their pantry but a package of spaghetti and some breadcrumbs. Their life had hit rock bottom, and it was only after a touching act of charity that they were able to get on their feet again. Inspired by this gesture of kindness as well as the beloved Little House on the Prairie books, Merissa found that a life of self-sufficiency and simplicity could be charming and blissful. She set out to live an entirely made-from-scratch life, the "Little House" way, and as a result, she slashed her household budget by nearly half—saving thousands of dollars a year. She started to write about homesteading, homemaking, and cooking from scratch, and over the next few years

developed the recipes and DIY projects that would one day become part of her now beloved website, LittleHouseLiving.com. As whole foods became staples of the family diet, Merissa realized the dangers of putting overly processed ingredients not only into our bodies, but on or near them as well. In addition to countless delicious, home-cooked meals, she developed natural, easy-to-make recipes for everything from sunscreen to taco seasoning mix, lemon poppy hand scrub to furniture polish. With their simple ingredients, these recipes are allergen friendly and many are gluten-free. With over 130 practical, simple DIY recipes, gorgeous full-color photographs, and Merissa's trademark charm in personal stories and tips, Little House Living is the epitome of heartland warmth and prairie inspiration. Nowadays life is more expensive than it used to be two decades ago. But still, there are many ways in which you can save money. Many people are afraid that living on a tight budget means compromising your quality of life. However, if you know a few tricks, you'll be able to both save money and live well.
