It is based around two principle ideas: that split-testing is the only way to determine the most effective keywords, ads and web page copy; and that you should focus your pay per click budget on those keywords that generate the most profit per click or the lowest cost per conversion. This book shows the techniques that professional search engine marketers use to pick the best keywords and allocate budget accordingly.

Levinson and Horowitz show the dramatic potential for profit in not just being a green company, but in addressing the huge social problems that have stumped humankind for millennia. Green practices can save and make money, and deep social change can skyrocket those revenues---when marketed correctly.

The goal of search engine optimization is to have your website ranked in the top ten internet search hits that appear on the first page. Why is it important to be on the first page? It is important because the average internet user doesn't click on any of the sites listed on the second or third page. Out of sight, out of mind. One of our clients reported a two hundred and ten percent increase on her e-commerce sight when we redesigned her webpage for optimal search engine optimization.
