This textbook is intended to give an introduction to and an overview of sta- of-the-art techniques in the design of complex embedded systems. The book title is SAMOS for two major reasons. First, it tries to focus on the actual distinct, yet important problem ?elds of System-Level design of embedded systems, including mapping techniques and synthesis,Architectural design,Modeling issues such as speci?cation languages, formal models, and- nallySimulation. The second reason is that the volume includes a number of papers presented at a workshop with the same name on the Island of Samos, Greece, in July 2001. In order to receive international attention, a number of reputed researchers were invited to this workshop to present their current work. Participation was by invitation only. For the volume presented here, a number of additional papers where selected based on a call for papers. All contributions were refereed. This volume presents a selection of 18 of the refereed papers, including 2 invited papers. The textbook is organized according to four topics: The ?rst isA)System-LevelDesignandSimulation.Inthissection,wepresentacollectionofpapers that give an overview of the challenging goal to design and explore alternatives of embedded system implementations at the system-level. One paper gives an overview of models and tools used in system-level design. The other papers present new models to describe applications, provide models for re?nement and design space exploration, and for tradeo? analysis between cost and ?exibility of an implementation.

Book & CD. In a developmental state like South Africa, municipalities have the specific responsibility of generating growth and development in their areas of jurisdiction. Through consultative processes, municipal goals and functioning are in the public domain. As co-creator of the future of local communities, municipalities must master the totality of local governance. To do this, current and prospective municipal managers need to understand, for example: the role and functions of municipalities in South Africa; the constitutional dispensation as it affects municipalities; the strategic orientation of municipalities within the global and national contexts; the capacities and resources available; best practices as far as management processes, procedures and methods are concerned. The book explores the multifaceted nature of municipal management in South Africa and focuses the readers attention on selected key strategic issues such as: local economic development; local democracy; disaster risk reduction.

A theoretical exploration into those 'doing charity' in relation to the concept's symbolic influence, and how we can critique contemporary charity works. Doing charity work is usually seen as a 'good thing': socially worthy, a sign of moral value, an exhibition of an individual's inherent altruism and kindness. But how exactly this symbolic power operates, and what happens when it is misused? Drawing on the sociology of Bourdieu in novel ways, this book examines a wide range of current and engaging examples from culture, politics and society to explore different experiences of charity and shed new light on their meaning. At a time when trust in charities and the charitable sector is precarious, this book presents an original analysis and qualitative data to ensure we continue to critique how contemporary charity works, focused on the hidden but always present backstage of charitable activity.

The enlightened shareholder value principle (ESV) was formulated during the comprehensive review of UK company law by the Company Law Steering Group in the late 1990s and early 2000's and requires directors of companies to act in the collective best interests of shareholders. The principle was taken up by the then UK Government and is now embedded in the Companies Act 2006. The emergence of the principle constitutes an important development in corporate governance, particularly in determining what directors must consider

when managing the affairs of their companies. This book explains and analyzes the nature of ESV and its contribution to corporate governance whilst also examining where it fits into the existing theoretical landscape. Andrew Keay traces the development of the principle of ESV and considers it in the context of the existing principles which have historically influenced corporate governance. In doing so, the book draws on several empirical studies thereby enabling us to gauge how the ESV principle is addressed in commercial practice. Keay goes on to compare ESV with the constituency statutes that apply in the US in order to determine whether anything can be learnt from the American experience. The book also assesses the reaction of other jurisdictions to the advent of ESV and considers what impact ESV will have on financial institutions and non-financial institutions in the aftermath of the global financial crisis.

What is the difference between an academic and professional qualification? Who should get a professional qualification? Did you know that some professions can not be legally practised with a degree alone? Why get a UK qualification? Is it expensive to gain a British qualification? What is a chartered institute or society, and is it better than a non-chartered body? What is the difference between a professional body and a trade union? These are all questions answered in this book which is designed to help individuals choose a career path and the right professional organisation. In today's world it isn't enough to have a qualification, you need to be able to meet with peers and use the valuable networks that are already in place to foster your profession. Your Professional Qualification provides a comprehensive survey of the qualifications available in the UK along with guidance on where they lead, entry requirements, where to apply and where to study. Derived from the vast and authoritative British Qualifications database, this important publication provides the first easily accessible guide to qualifications and how to get them in the UK. Built around a comprehensive directory of professional qualifying bodies each professional area is described in depth and its qualifications identified and explained. The book is supported by a simple website, which ensures purchasers of the book are kept up-to-speed with new developments.

The voluntary sector contains over 50,000 organizations, 320,000 paid staff, and 3 million volunteers. The accounting and financial management of organizations in this sector poses as many difficulties as that of major for-profit organizations, if not more so, given the absence of the profit motive upon which much traditional accounting, finance practice and theory has been developed. This book explores the unique environmental, managerial and philosophical aspects of voluntary organizations as well as the technical specialist characteristics of financial accounting, auditing and taxation that

differentiate their role. Introducing and providing descriptions of the main applications of accounting and finance applicable to the role of financial manager, this book uses real life case studies and examines the debates presented by other writers in the field. This key book helps readers make their own critical judgements, and contributes to their understanding of the distinctiveness of voluntary sector accounting and financial management.

Sport governance has become an increasingly widespread subject for research and teaching in sports studies. This engaging and accessible textbook examines the governance of sport organisations in a changing political, legal, financial and socio-cultural context. It explains how sport organisations are governed, explores the issues and challenges faced by those governing sport today, and looks ahead to how sport can be governed better in the future. Covering sport at all levels, from community organisations and national governing bodies to international organisations such as the IOC and FIFA, this text examines key components of governance, such as legal and regulatory frameworks, stakeholding, performance, compliance and the reform of the non-profit sector in line with corporate governance. This text is also timely given that recent corruption scandals in sport have served to highlight the central importance of good governance in sport. Its nine chapters draw upon more than thirty international case examples across a range of sports including athletics, football, gymnastics, hockey, rowing, rugby, badminton and tennis. With extensive lists of learning activities and resources, original empirical research and insights into the politics of policymaking and implementation, this textbook is essential reading for any course on sport governance, policy, management or development.

Business Accounting has been developed specifically for the needs of non-specialist students studying accounting as part of another degree. The authors explain the key concepts clearly and concisely, using examples, cases and real company data to contextualise the theory. Ethics,

corporate governance and corporate social responsibility is given more prominence in this new edition and a new chapter on the statement of cash flows has been added. The number of questions in the book and online has been increased substantially to provide students with more opportunity to test their understanding and provide lecturers with more materials to perform assessments.

Covers the Internet, TCP/IP, scanner programs, passwords, sniffers, firewalls, audit tools, types of attacks, and setting up security for various types of systems.

As more individuals own and operate Internet-enabled devices and more critical government and industrial systems rely on advanced technologies, the issue of cybercrime has become a crucial concern for both the general public and professionals alike. The Psychology of Cyber Crime: Concepts and Principles aims to be the leading reference examining the psychology of cybercrime. This book considers many aspects of cybercrime, including research on offenders, legal issues, the impact of cybercrime on victims, punishment, and preventative measures. It is designed as a source for researchers and practitioners in the disciplines of criminology, cyberpsychology, and forensic psychology, though it is also likely to be of significant interest to many students of information technology and other related disciplines.

Corporate governance is an area that has grown rapidly, fuelled by high profile corporate collapses such as Enron. This is a student-focused text which takes an international approach to the subject.

Corporate governance around the world continues to develop rapidly and this new edition has been extensively rewritten to reflect these changes. The

*global financial crisis has led to a whole host of changes in corporate governance requirements, which are analysed by Bob Tricker. The Association of Chartered Certified Accountants (ACCA) is the global body for professional accountants. With over 100 years of providing world-class accounting and finance qualifications, the ACCA has significantly raised its international profile in recent years and now supports a BSc (Hons) in Applied Accounting and an MBA.BPP Learning Media is an ACCA Official Publisher. The P1 Professional Accountant exam is based on the themes of professionalism, responsibility and accountability. The syllabus emphasises what is important for a well-run organisation and illustrates the factors underpinning professional behaviour by accountants: * Corporate governance arrangements should ensure that the organisation functions smoothly and directors and managers are accountable * Corporate governance requires sound systems of internal control and risk management * Accountants should think carefully about what their ethical positions are and what views of society their professional opinions support * Accountants and businesses should be aware of the social and environmental impacts their activities have.The examiner-reviewed Study Text provides everything you need to know for P1. It explains the theories behind the key areas of corporate governance and ethics, and demonstrates how the theories translate into practice. The Text gives lots of examples of the risks organisations face. It also shows how businesses are coping with their wider social responsibilities, which the examiner has highlighted as very important. BPP Learning Media is the publisher of choice for many ACCA students and tuition providers worldwide. Join them and plug into a world of expertise in ACCA exams.*

With the advent of electronic commerce, and the increasing sophistication of the information systems used in business organizations, control and security have become key management issues. Responsibility for ensuring that controls are well designed and properly managed can no longer simply be delegated to the technical experts. It has become an area in which the whole management team needs to be involved. This comprehensive review, written for the business reader, includes coverage of recent developments in electronic commerce, as well as the more traditional systems found in many organizations, both large and small. Intended for any manager whose work depends on financial or other business information, it includes case studies, summaries and review questions, making it equally suitable as a source text for students of business studies at postgraduate or advanced level.

Cutting Edge Internal Auditing provides guidance and knowledge for every internal auditor, encouraging each to pioneer new ground in the development of their professional practices in all risk management, control and governance processes.

Serving as an excellent reference guide that develops a pattern of internal auditing now and for the future, this book explores the concept of 'cutting edge' internal auditing as an imaginative adventure: demonstrating how this has influenced and will continue to influence the development of professionalism in internal auditing. Built on the foundations of Jeffrey Ridley's extensive internal auditing experience across the public and private sectors, the author uses his articles and research to explore and develop the motivations, goals and categories of innovation in internal auditing today. It develops and brings up to date an imaginative internal auditing model, created and used by the author in the early 1980s, drawing on research and guidance by The Institute of Internal Auditors Inc., its Research Foundation and the Institute of Internal Auditors - UK and Ireland. Each chapter stands alone by focusing on an individual internal auditing theme, considered from both the perspective of internal auditing and its customers to suggest an appropriate vision as a goal for every internal audit activity. Each chapter also includes self-assessment questions to challenge the readers understanding of its messages. Companion website contains some of the author's training slides and seventy case studies, many written by leading internal audit practitioners, this book creates a vision for future cutting edge internal auditing.

The background of this research is related to innovative lightweight construction methods for short-term applications realized with highly recyclable materials produced from renewable resources. Specifically, the possibility of using selected paper-based products for design purposes is examined. The main topic discussed regards the state of the art and future potential of joining techniques for assemblies and structures designed with paper-based products. In this context, the preference on paper-tubes for a variety of designs is examined closely. A collection of case studies for selected joining techniques supported with digital tools, fabrication of prototypes and targeted structural experiments demonstrates possibilities and considerations. This book presents the research process and aims to inspire architects, designers and engineers who are eager to discuss on material innovation and the steps that need to be taken to examine the feasibility of such ideas.

The 15th Workshop on Languages and Compilers for Parallel Computing was held in July 2002 at the University of Maryland, College Park. It was jointly sponsored by the Department of Computer Science at the University of Ma- land and the University of Maryland Institute for Advanced Computer Studies (UMIACS).LCPC2002broughttogetherover60researchersfromacademiaand research institutions from many countries. The program of 26 papers was selected from 32 submissions. Each paper was reviewed by at least three Program Committee members and sometimes by additional reviewers. Prior to the workshop, revised versions of accepted papers were informally published on the workshop's website and in a paper proceedings that was distributed at the meeting. This year, the workshopwas organizedinto sessions of papers on related topics, and each session consisted of two to three 30-minute presentations.Based on feedback from the workshop,the papers were revised and submitted for inclusion in the formal proceedings published in this volume. Two papers were presented at the workshop but later withdrawn from the ?nal proceedings by their authors. We were very lucky to have Bill Carlson from the Department of Defense give the LCPC 2002 keynote speech on "UPC: A C Language for Shared M- ory Parallel Programming." Bill gave an excellent overview of the features and programming model of the UPC parallel programming language.
