Summary of The 4-Hour Workweek - A Comprehensive Summary Being financially rich and having the ability to live like a millionaire are two fundamentally different concepts. Similarly, the thing that differentiates deferrers (D) and newly rich (NR) is that the Ds save everything good and worthwhile for the end and are surprised by how sooner it comes whereas the NRs abandon this deferred-life plan and create luxury lifestyle in the present using time and mobility. The NRs are distinguishable from the crowd based on their goals, which reflect very distinct priorities and life philosophies. While the Ds work for themselves, the NRs have others work for them. While the Ds work when they want to, the NRs have the concept of working the minimum necessary for the maximum effect. While the Ds want to buy all the things that they want to, the NRs focus on doing all the things they want to do. While the Ds want to be the boss, the NRs neither aspire to be a boss nor an employee but want to be an owner. And finally, while the Ds just want to have more, the NRs want to have more quality than quantity and that with a purpose too. Practically speaking, money can multiply depending on the number of W's you can control; what, when, where and with... To be continued... Teachers see many opportunities for freelance work but is it really possible to make a living as a freelancer in the long-term? In this book, Janine Bray-Mueller has encapsulated some key lessons on pricing, learned during her career as a freelancer. In a competitive market, pricing is problematic, particularly in uncertain economic times. Establishing a sustainable business relies on charging enough to pay not just for immediate living expenses, but also to update and extend your teaching skills, and cover costs such as holidays, sickness and pension provision. Understanding why many teachers are trapped in a position of underearning is the first step to escape. Many teachers can be their own worst enemy if they lack self-confidence or undervalue their skills. Familiarity with local market conditions and competitors' prices is important, but the 'going rate' is not necessarily an appropriate rate to charge. Janine explains how to balance your business on three pillars: consultancy (one-to-one teaching), training (seminar workshops) and leverage (information products). This concept will enable you to build up a sustainable teaching business. Various pricing strategies are described with advice on how to select those which are appropriate for different types of products, services and customers. Specialisation is a key strand in establishing a sustainable level of pricing. You may be under constant pressure to discount prices, but Janine makes clear the dangers in doing so. She also deals with when and how to increase prices to avoid a return to underearning. Value-based pricing is an approach which Janine has applied very successfully to freelance teaching, and this is explained fully with valuable practical advice on how it can give you a more flexible approach to pricing. Pricing Matters is full of careful explanations of key business concepts and practical advice on applying them in the context of freelance work. Step by step instructions are given on how to identify both your personal and business costs. With the aid of this book, you can calculate your available teaching time, so that you can establish your resentment number and price range. The worksheets and checklists included will help you to clarify your strategy and position yourself in the market. Janine presents effective ways to manage pricing in an entertaining way and makes them both meaningful and memorable for the freelance teacher. Her book contains all you need to know to overcome your demons, price your teaching services effectively and establish a financially sound career which is sustainable in the long-term.

E-mail marketing is hands down the most powerful and effective form of online marketing. Nothing comes close. Seriously. Even search marketing with all its hype and tried-and-proven success can't even hold the candle to just how effective list marketing can be. It's easy to see why, survey after survey, marketing firms keep putting e-mail marketing at or near the top of their advertising preferences. Here are the reasons why. Through e-mail marketing, you can get in front of the eyeballs of your audience members anytime anywhere. That's right. You can be at a beach in the Bahamas somewhere writing an e-mail update. Plug that in to your e-mail service provider and your audience, regardless of where they may be in the world and regardless of what they're doing, are sure to get your e-mail. After all, most people check their e-mail inboxes. Isn't that awesome? This enables you to sell more products. Since you have a de facto relationship with people who voluntarily got on your mailing list, you are able to keep the conversation going. You don't get just one bite at the apple in trying to get list members to buy.
