With Day One, Genesis 1.1-5, as a focus and informed by the understanding that all texts are intertexts. S. D. Giere shapes and employs a method that harnesses the idea of intertextuality for the purpose of exploring the history of interpretation of a biblical text. With a unique compilation of intertexts of Gen 1.1-5, the work explores the intertextual reach of Day One in Hebrew and Greek texts up to c. 200 CE. What emerges is a glimpse of the intertextuality of Day One that provides insight into the complexity of the intertextuality of a biblical text and the relationship of intertextuality and interpretation. The objective of the Common Sense SAT Workbook is simple: To help as many students as possible improve their SAT scores (Reading, Writing, Math) as much as possible. To achieve this end, the following means are provided: For each subject, a concise synopsis of test-taking techniques to help answer more questions correctly; for Reading, a basic study of Latin prefixes, roots and suffixes to improve vocabulary; for

Writing, a complete English primer to learn or review the rules of grammar; and for Math, also a complete primer to learn or review all the skills and operations required for the test. For Writing and Math, each rule, skill or operation is defined, exemplified, proceeded by a set of ten related problems, then cross-referenced against the ten tests within the Official SAT Study Guide : Second Edition, the only available source for real SATs. Summarily, if a student makes an effort as well as learns from his or her mistakes -- a cornerstone to any good education -- then his or her SAT scores will naturally and significantly increase.

"Contemporary mainstream psychology has moved toward methodological specificity bounded by instrumentalism. However, this institutional reduction of sanctioned methods has not been fully embraced by all social scientists, nor even by all experimental psychologists. The social sciences are rife with examples of practicing empirical scientists disaffected with the reductionism and atomism of traditional experimentalism.The empirical theory and practice of four of these disaffected social scientists—Lev Vygotsky, James Baldwin, James Gibson, and Kurt Lewin—is explored in this volume. Each of the scientists considered here argued for a rigorously empirical method while still maintaining a clear anti-reductionist stance. They justified their disaffection with the dominant psychological paradigms of their respective eras in terms of a fidelity to their phenomena of study, a fidelity they believed would be compromised by radical reductionism and ontological atomism.The authors in this collection explore the theory and practice of these eminent researchers and from it find inspiration for contemporary social science. The primary argument running through these analyses is that the social sciences should take seriously the notion of holistic empirical investigation. This means, among other things, re-establishing the indissoluble ties between theory, method and procedure and resisting the manualization of research procedures. It also means developing theories of relations and not simply of elemental properties. Such theories would concern particular units, fields, or systems of relations and not be reduced to, or interpreted in the terms of, other systems. Finally, a holistic social science requires integration of the active agent into theory, method, and procedure, an integration that points toward both participatory and emancipatory methods."

This open access book clarifies confusions of strategy that have existed for nearly 40 years through the core thoughts of three fundamental elements. Unlike the traditional definition of strategy as "a plan to achieve a long-term goal from overall considerations" in a linear view, this book defines strategy from non-linear viewpoint as it is in the real world. The art of a strategy lies not only in the determination of development goals, but also in the identification of development problems and putting forward overall guiding ideology of solving problems. Rich illustrations as well as numerous business and military cases are presented in helping readers to understand the fundamental elements of strategy.The general scope of the book includes introductions to the three fundamental elements of strategy, three-sub decisions of a complete strategic decision, incomplete strategies, relationship between tactic and strategy, three elements of competitive and corporate strategies. There may be biases in company-level, real strategic decision-making which makes a complete strategy not necessarily a perfect one. The book introduces biases and reasons for the biases, helping industrial strategic decision-makers understand the importance of knowing the nature of the company, the industry and its environment. In addition, this book also presents principles and evaluation approaches of strategic decisions, explores the reasons for the excessive definitions of the strategy concept, and discusses directions of future's research tasks.The book will benefit business managers who are interested in knowing what a complete strategic decision is and how to avoid errors or biases in strategic decision-making. It also benefits students in business schools (especially in MBA/EMBA programs) who are (or will be) on executive positions. Academic researchers may find it is interesting to understand strategy from the view of the three elements. The new view provides a novel insight into strategy and promotes several research directions in the future. The three elements of strategy are also applicable to military

strategies and readers who are interested in military and may find its value as well.

Children spend more time in school than in any social institution outside the home. And schools probably exert more influence on children's development and life chances than any environment beyond the home and neighbourhood. The purpose of this book is to document some important ways schools influence children's development and to describe various models and methods for studying schooling effects. Key features include: Comprehensive Coverage – this is the first book to provide a comprehensive review of what is known about schools as a context for human development. Topical coverage ranges from theoretical foundations to investigative methodologies and from classroom-level influences such as teacher-student relations to broader influences such as school organization and educational policies. Cross-Disciplinary – this volume brings together the divergent perspectives, methods and findings of scholars from a variety of disciplines, among them educational psychology, developmental psychology, school psychology, social psychology, psychiatry, sociology, and educational policy. Chapter Structure – to ensure continuity, chapter authors describe 1) how schooling influences are conceptualized 2) identify their theoretical and methodological approaches 3) discuss the strengths and weaknesses of existing research and 4) highlight implications for future research, practice, and policy. Methodologies – chapters included in the text feature various methodologies including longitudinal studies, hierarchical linear models, experimental and quasi-experimental designs, and mixed methods.

The second largest ethnic group in Alberta, the German ethnolinguistic community has played a significant role in Alberta's history, but the future is bleak for maintaining German language and culture in the multicultural mosaic of Alberta. This book examines the stature of the German language in Alberta by addressing the use of German in the community and the teaching of German in schools and universities in the province.
