Perfect for: • Diploma of Nursing Students. Apply theory to practice with the Clinical Cases textbook series! Clinical Cases: Nursing Care Studies is the perfect textbook for nursing students completing their Diploma. This nursing book offers a variety of case studies based on common real-life examples that you are likely to encounter in practice. Written by Margaret Webb and Ellie Kirov, Nursing Care Studies focusses on key nursing care topics, including: Vital Signs, Skin Integrity and

Wound Care, Community-based Care, General Health Assessment, Medications and Palliative Care. Benefit from the logical structure of this nursing book, where each case study begins with an introduction of the presenting condition and associated symptoms. As the scenario develops, more information is provided, such as the patient's condition, medications, tests and other important factors. Best of all, the conclusion of each case study emphasises patient outcomes and emphasises key points, providing you a great summary to reflect on. Make the most of Clinical Cases: Nursing Care Studies by using it in conjunction with Tabbner's Nursing Care: Theory and Practice, 6th Edition by Gabby Koutoukidis, Kate Stainton and Jodie Hughson as you progress through your Diploma of Nursing. Used together, these nursing textbooks provide a strong foundation for your knowledge of important themes and issues in nursing care. Support your nursing education by purchasing the other great titles available in the Clinical Cases textbook series. Other titles in this series: • Clinical Cases: Fundamentals of Nursing Case Studies by Natasha Scully and Damian Wilson. • Clinical Cases: Medical-Surgical Nursing Case Studies by Janine Bothe. Other formats: This book is also available as an App via the Apple App Store <https://itunes.apple.com/au/app/clinical-cases-nursing-care/id659030265?mt=8> • Easy-to-understand, logical layout. • 24 case studies covering key topics in nursing care. • Multiple choice questions to test your knowledge throughout the textbook. • Rationales provided for all answers. • References for further reading and research. • Designed as an exam preparation and revision tool.

Preceded by: Medical-surgical nursing: critical reasoning in patient care / Priscilla LeMone, Karen Burke, Gerene Bauldoff, Paula Gubrud. Sixth edition. [2015]. Living with Chronic Illness and Disability: Principles for Nursing Practice provides the knowledge and skills necessary for nursing and allied health students to provide quality, competent care to people living with a chronic illness or disability. *Module on Preventive Strategies for Non-Communicable Diseases for Nursing and Allied Health Science is of interest not only to the nursing fraternity but for the entire health professionals as we all are associated with each other in one way or another. The content relates to present data and the preventive strategies of different NCDs, which health personnel should know. The primary objective of this book is to throw light on the preventive strategies of some major non-communicable diseases, such as cardiovascular diseases, cancers, diabetes, chronic respiratory disorders, Alzheimer's diseases and osteoporosis. These are all challenges for our country. Special efforts have been taken to enhance the richness of the material by including current statistical information on each of these diseases. This would not only provide insight into the actual burden imposed by these diseases but also into the anticipated burden if proper measures are not taken to check the ever-increasing morbidity.*

**Andalas International Nursing Conference (AINiC) is a dedicated conference aimed at researchers in nursing, public health and other health sciences topics. The 1st AINiC 2017 was held in Padang, West Sumatra, Indonesia, from 25-27 September 2017. The conference theme was "Strengthening Research Capacity and Disseminating New Findings in Nursing and Public Health". This event was successful in bringing together experts, researchers, healthcare professionals, and students worldwide. It was an inspiring occasion for most of the participants and was a great opportunity for research development learning, especially with regard to disseminating new findings in nursing and to stimulate networking of nursing professionals, researchers and educators. The research topics that were presented during the conference have clearly indicated the need for literature development and guidance of clinical practice decisions. We hope this conference**

has provided ample opportunities for participants to gain a more in-depth understanding of knowledge and renewed perspectives. All these aspects have been acknowledged by the participants during the conference. The 1st AINiC was a rewarding event and we look forward to your attendance and participation in the next AINiC conference that will also provide stimulating research developments, networking and cooperation.
