This book demonstrates the value of approaching education from a sociological and philosophical perspective. Specifically, it addresses current and long-standing educational issues in the Asia-Pacific region, integrating sociological and philosophical insights with practical applications in four key areas: educational aims, moral education, educational policy, and the East-West dichotomy. It discusses educational aims in terms of rationality, philosophical thinking, and sustainable development and presents the literary, religious, and analytical approaches to moral education. Four educational policies are then considered: Hong Kong's language policy, Hong Kong's policy on the internationalization of education, East Asia's policies on English education, and Australia's policy on teacher education. Different aspects of the East-West dichotomy are analysed: Confucian rationalism versus Western rationalism, Confucian learning culture versus Western learning culture, and Asian research methodology versus Western research methodology. Taken as a whole, the book shows that issues in education are rarely simple, and looking at them from multiple perspectives allows for rich and informed debates. It presents a rare philosophical and sociological analysis of the cultures and experiences of education in the Asia-Pacific region, and promotes research that leads to more culturally rooted educational policies and practice.

Heritage language (HL) education has as its primary aims to help learners regain, develop, or maintain their HL while gaining deeper understanding of their cultural heritage. The topic has gained traction in recent years, as the interest in bilingual education and the numbers of people speaking English as a second language have grown. Teachers play a vital role in advancing HL learning (HLL). This edited volume presents them with the knowledge and tools necessary to overcome common obstacles in HLL based on cutting-edge research. In twelve chapters, contributors address the various types of challenges faced in trying to transfer research findings into new teaching approaches and encourages teacher innovation. Part I reviews fundamental issues in curricular, teacher, and program development, while Part II addresses pedagogical strategies, techniques, and approaches. The book seeks to answer questions such as, What are the best ways to help HLL acquire language for use in professional settings? How should HL learners' skills be assessed? How should new HL programs be designed? How do we define HL learners? How do we prepare teachers to meet their needs? While many HLL books focus on Spanish, information on multiple languages is included in this book.

The federal government's No Child Left Behind Act has thrust high-stakes testing - its goals, methods, and consequences - into the educational limelight. The four-fold purpose of this book is to: describe the nature of high-stakes testing; identify types of collateral damage that have attended the testing programs; analyze methods different groups of people have chosen for coping with the damage and suggest lessons to be learned from the high-stakes-testing experience. The six groups of people whose coping strategies are inspected include: politicians and their staffs; educational administrators and their staffs; parents and the public; test makers and test administrators; teachers and students. Importantly, the author avoids aligning himself with the test-bashing rhetoric of those who oppose high-stakes testing, especially the No Child Left Behind Act. Key features of this outstanding new book include: illustrative cases. The book offers more than 350 cases of collateral damage from high-stakes testing--and people's coping strategies--as reported in newspapers over the 2002-2004 period. background perspectives. Part I examines the influence of high-stakes testing on: 1) what schools teach; 2) how student progress is evaluated; 3) how achievement standards are set; and 4) how test results are used. participant responses. Part II, which is the heart of the book, devotes a separate chapter to the coping strategies of each of the major participants in the high-stakes testing movement: politicians and their staffs, educational administrators and their staffs, parents and the public, test-makers and test-givers, teachers, and students. summary chapter. The last chapter (Lessons to Learn) offers suggestions for minimizing collateral damage by adopting alternative approaches not used in the creation of our current high-stakes testing programs, particularly the federal government's No Child Left Behind Act. This book is appropriate for any of the following audiences: students taking evaluation or administration courses in schools of education, inservice administrators and teachers, policy makers, and those members of the general public who are concerned about the fate of schooling in America.

This volume is composed of 24 papers originally presented as talks at the VIII National Conference of the Italian Association of University Language Centres (Associazione Italiana dei Centri Linguistici Universitari: AICLU), held at the University of Foggia, Italy, between 30 May and 1st June 2013. The contributions fall into five sections: 1) keynote addresses from plenary speakers; 2) innovative challenges for language centres; 3) new developments in teaching language for specific purposes; 4) proposals and case studies in Content and Language Integrated Learning; and 5) the use of new technologies in language learning. 18 papers are in English, four in Italian, one in French and one in German. The fact that three-quarters of the papers are in English reflects the way English has become the lingua franca of academic conferences today. However, in keeping with the ethos of CercleS (Confédération Européenne des Centres de Langues de l'Enseignement Supérieur, the pan-European organisation to which AICLU belongs), which is strongly committed to promoting plurilingualism, it was crucial that contributions would also be accepted in other languages. The volume represents the 'state of the art' in the field of language teaching and theory in university language centres not only in Italy, but also in other parts of Europe and the Mediterranean, and testifies to the rich variety of ways in which these centres are adapting and thriving in rapidly changing times.

Language teacher education is widely identified as one of the most important areas that needs addressing in order to improve early language instruction, yet research into teacher education for early language teachers remains relatively sparse. This volume responds to this gap by compiling studies with diverse methodological tenets from a wide range of geographical and educational contexts around the world. The volume aims to enhance understanding of early language teacher education as well as to address the need to prepare early language teachers and assist them in their professional development. The chapters focus on the complexity of teacher learning, innovations in mentoring and teacher supervision, strategies in programme development and perceptions, and knowledge and assessment in early language learning teacher education. The volume offers comprehensive coverage of the field by addressing various aspects of teacher education in different languages. The contributions highlight examples of research into current practice in the professional enhancement of early language learning teachers, but with an emphasis on the implications for practitioners.

AAUSC 2014 Volume - Issues in Language Program Direction: Innovation and Accountability in Language Program Evaluation

This book presents an overview of revisiting the assessment of language abilities. It also showcases how the measurement of such constructs can result in negative or positive washback and how outcomes might be conducive to repercussions that decide on the future of many stakeholders. The 23 chapters were selected among tens of chapters received from different contexts that addressed the issue of revisiting the assessment of language abilities, such as Tunisia, Ukraine, Algeria, Russia, KSA, Sudan, Egypt, Canada, Kurdistan, UK, USA, Iran, Turkey, etc. These contexts have highlighted the necessity to revisit the different constructs which should be assessed with a clear and straightforward foundation on students' learning objectives and their actual language ability. To do so, most of the chapters present hands-on use of relevant statistical tests that might serve in revisiting the

construct definition both theoretically and operationally. Perhaps the sole and intricate question that the authors of these contributions ask is what it means to revisit the assessment of the construct of individualized language ability and how. In addition, the book accentuates the momentousness and significance of reflecting on test fairness and validation as the mainspring and backbone for democratization of assessment. This book appeals to a broad readership, such as English Language Teaching (ELT) practitioners, language teachers, students, testing organizations, policy-makers, test designers, writers of test specifications, testing experts, researchers, program evaluators, especially in the Middle East and North Africa (MENA) as well as other international contexts.

Despite the promise of competency-based education (CBE), learner-centered issues related to support, retention, and program completion rates remain problematic. In addition, the infrastructure for higher education, including issues related to faculty (intellectual property, workload, and curriculum), pose barriers and challenges in the design, development, implementation, and delivery of CBE. In response, administrators, faculty, designers, and developers of competency-based experiences must incorporate innovative strategies that are foreign to the traditional institution. A strong emphasis on retention and graduation rates must surround the student with support, starting with the design and development of the CBE system. There are few resources that can help prepare instructional designers, advisors, academic administrators, and faculty to meet the many challenges of designing, developing, implementing, and managing CBE. *Career Ready Education Through Experiential Learning* is an essential reference book that includes strategies for design and development of competency-based education (CBE) programs, as well as administrative and delivery strategies as examples of how CBE can be implemented. Through a strong theoretical framework, chapters present the best practices, strategies, and practical tips as examples and scenarios that can be used in higher education settings. While highlighting education courses, programs, and lessons across various institutions and educational domains, this book is ideal for higher education administrators and policy designers/implementors, instructional designers, curriculum developers, faculty, public policy leaders, students in curriculum and instruction and instructional technology programs, along with researchers and practitioners interested in CBE and experiential learning in higher education.

The authors bring more than twenty-five years of unmatched experience to this text, along with sound statistical methodology, a proven problem-scenario approach, and meaningful applications that clearly demonstrate how statistical information informs decisions in the business world. Thoroughly updated, the text's more than 350 real business examples, cases, and memorable exercises present the latest statistical data and business information with unwavering accuracy. And, to give you the most relevant text you can get for your course, you select the topics you want, including coverage of popular commercial statistical software programs like Minitab 16 and Excel 2013, along with StatTools and other leading Excel 2013 statistical add-ins. The seventeen chapters brought together in this volume represent a selection of papers presented at the International Conference on Bilingualism held in March 2015 at the University of Malta's Valetta campus. The multifaceted nature of the conference is evident in the diverse viewpoints from a range of authors who analyse aspects of the linguistic situations in Brazil, Bulgaria, France, Germany, Greece, Israel, Italy, Macau, Malta, Poland, Romania, Sri Lanka, and the United Kingdom. The volume comprises chapters on Code-Switching, Linguistic Landscape, Bilingualism, Culture and Identity, Language Policy, Bilingual Education, and Trilingualism. This book is a valuable resource not only for students and scholars, but also for language teachers interested in the variegated nature of bilingualism in various countries in Europe, Asia, and South America.

This book clarifies the fundamental difference between North America-based instrumental motivation and Korea (and East Asia)-specific competitive motivation by which the EFL learners' excessive competition to be admitted to famous universities and to be hired at a large-scale conglomerate is the main source of L2 motivation. It enables readers to understand that EFL-learning motivation reflects unique sociohistorical contexts grounded in a specific region or country. This book in turn necessitates the need to develop EFL motivation theory and research tradition which are firmly based on East Asian values and culture. ?

Perspectives on Language Assessment Literacy describes how the elements of language assessment literacy can help teachers gather information about when and how to assess learners, and about using the appropriate assessment tools to interpret results in a fair way. It provides highlights from past and current research, descriptions of assessment processes that enhance LAL, case studies from classrooms, and suggestions for professional dialogue and collaboration. This book will help to foster continuous learning, empower learners and teachers and make them more confident in their assessment tasks, and reassure decision makers that what is going on in assessment meets international benchmarks and standards. It addresses issues like concepts and challenges of assessment, the impacts of reflective feedback on assessment, the ontogenetic nature of assessment literacy, the reliability of classroom-based assessment, and interfaces between teaching and assessment. It fills this gap in the literature by addressing the current status and future challenges of language assessment literacy. This book will be of great interest for academics, researchers, and post-graduate students in the fields of language assessment literacy and English language teaching.

Despite rapid globalization within contemporary society and the seemingly obvious need for the study of foreign languages (FL) and cultures; recruitment to undergraduate FL degrees has dwindled, graduate programs have disappeared; and institutions have restructured independent language departments into mega-departments of languages, literatures, and cultures. At the same time, the FL and humanities disciplines have engaged in "soul-searching" exercises in an effort to understand and express a renewed sense of value for the study of foreign language and culture. As a result of these kinds of societal and disciplinary movements, FL programs, along with other educational sectors, are facing the increased need to engage with peripheral forces like accountability and accreditation, to express and ensure their value through outcomes assessment, and to begin to think, innovate, and behave programmatically. Key to enacting these changes systematically and effectively is heightened awareness of the importance of program evaluation, not only as a means to demonstrate how and why FL study is a valuable pursuit in today's world, but also as a process through which sound improvements can be made, participants can learn, and educational relevance can be sought. Current research within the framework of Construction Grammar (CxG) has mainly adopted a theoretical or descriptive approach, neglecting the more applied perspective and especially the question of how language acquisition and pedagogy can benefit from a CxG-based approach. The present volume explores various aspects of "Applied Construction Grammar" through a collection of studies that apply CxG and CxG-inspired approaches to relevant issues in L2 acquisition and teaching. Relying on empirical data and covering a wide range of constructions and languages, the chapters show how the cross-fertilization of CxG and L2 acquisition/teaching can improve the description of learners' use of constructions, provide theoretical insights into the processes underlying their acquisition (e.g. with reference to inheritance links or transfer from the L1), or lead to novel teaching practices and resources aimed to help learners make the generalizations that native speakers make naturally from the input they receive.

The Routledge Handbook of Arabic Second Language Acquisition introduces major current approaches in Arabic second language acquisition (SLA) research and offers empirical findings on crucial aspects and issues to do with the learning of Arabic as a foreign language and Arabic SLA. It brings together leading academics in the field to synthesize existing research and develops a new framework for analyzing important topics within Arabic SLA. This handbook will be suitable as a reference work for advanced undergraduate and postgraduate students and scholars actively researching in this area and is primarily relevant to sister disciplines within teacher training and Arabic applied linguistics. The themes and findings should, however, also be attractive to other areas of study, including theoretical linguistics, psycholinguistics, cognition, and cognitive psychology.

Reflecting the internationalization of the field of second language writing, this book focuses on political aspects and pedagogical issues of writing instruction and testing in a global context. High-stakes assessment impacts the lives of second language (L2) writers and their teachers around the world, be it the College English Test in China, Common Core-aligned assessments in the U.S., English proficiency tests in Poland, or the material conditions (such as access to technology, training, and other resources) affecting a classroom. With contributions from authors working in ten different countries in a variety of institutional contexts, the chapters examine the uses and abuses of various writing-related assessments, and the policies that determine their form and use. Representing a diverse range of contexts, methods, and disciplines, the authors jointly call for more equitable testing systems that consider the socioeconomic, psychometric, affective, institutional, and needs of all students who strive to gain access to education and employment opportunities related to English language proficiency.

This volume comprises of chapters that deal with language proficiency relating to a wide range of language program issues including curriculum, assessment, learners and instructors, and skill development. The chapters cover various aspects of a broad-based proficiency initiative, focusing on numerous aspects of foreign language learning, including how skills develop, how assessments can inform curriculum, how learners and instructors view proficiency and proficiency assessment, and how individual use of technology furthers language learning. The concluding chapter points the way forward for issues and questions that need to be addressed.

This volume explores communication and its implications on interpretation, vagueness, multilingualism, and multiculturalism. It investigates cross-cultural perspectives with original methods, models, and arguments emphasizing national, EU, and international perspectives. Both traditional fields of investigations along with an emerging new field (Legal Visual Studies) are discussed. Communication addresses the necessity of an ongoing interaction between jurilinguists and legal professionals. This interaction requires persuasive, convincing, and acceptable reasons in justifying transparency, visual analyses, and dialogue with the relevant audience. The book is divided into five complementary sections: Professional Legal Communication; Legal Language in a Multilingual and Multicultural Context; Legal Communication in the Courtroom; Laws on Language and Language Rights; and Visualizing Legal Communication. The book shows the

diversity in the understanding and practicing of legal communication and paves the way to an interdisciplinary and cross-cultural operation in our common understanding of legal communication. This book is suitable for advanced students in Linguistics and Law, and for academics and researchers working in the field of Language and Law and jurilinguists.

Offering a practical, case-based approach, Spanish and the Medical Interview: Clinical Cases and Exam Review is a unique, immersive study and review resource for medical Spanish. It provides extensive training and review in two formats: the print book contains numerous cases spanning a wide variety of clinical settings, formatted as a patient would present for medical attention, while the audio cases provide multiple opportunities to hone your listening comprehension skills. Together, these learning components test your knowledge and skills in caring for Spanish-speaking patients and prepare you for case-based examinations that test clinical skills in Spanish. This first-of-its-kind title is ideal as a stand-alone resource or as a companion to Dr. Ortega's Spanish and the Medical Interview: A Textbook for Clinically Relevant Medical Spanish. Helps you improve your interviewing skills, your understanding of patient responses, and your ability to explain a diagnosis and plan of care to Spanish-speaking patients, so you can provide a higher quality of patient care and safety in your practice. Covers multiple presentations of cases in main organ system areas, including musculoskeletal, cardiovascular, pulmonary, gastrointestinal, endocrine, genitourinary, neurologic, psychiatric, eye/ear/nose/throat, and pediatric, in multiple patient care settings such as urgent care, emergency department, outpatient clinic, and inpatient wards. · Focuses on topics that are particularly common in Hispanic/Latino patients and includes cultural health issues that may impact the patient's understanding of medical information, belief system, decision-making preferences, or access to care—all of which have a significant impact on your medical decision making and interviewing styles and effectiveness. Leads you through key information for each case, prompting you to use your medical Spanish clinical skills in a series of prompts and questions as the case unfolds. Assessment questions follow each case to test your comprehension. Provides more than two dozen audio cases to improve your listening comprehension of different nationalities and accents of Spanish-speaking patients. Provides real-world content from Drs. Pilar Ortega and Marco Alemán, who serve on the steering committee for the National Medical Spanish Taskforce that aims to standardize the educational approach to a national assessment examination for Medical Spanish. Expands your global skills set: in your home country, when caring for patients who speak Spanish, or when caring for patients in other countries through global medicine programs. Evolve Instructor site with an image and test bank is available to instructors through their Elsevier sales rep or via request at <https://evolve.elsevier.com>.
