Die Hoffnung, dass die Globalisierung und Demokratisierung der osteuropäischen Staaten in Europa zu einer Verringerung kultureller Unterschiede und der damit verbundenen Probleme führt, hat sich bislang nicht bewahrheitet. Im Gegenteil: Sowohl nationale Minderheiten als auch Einwandererminderheiten befinden sich nach wie vor in einem Dilemma zwischen Selbstbestimmung und

Integration. Der Band umfasst vier Themenbereiche: Im ersten Teil sollen theoretische Aspekte der Multikulturalismusdebatte aufgezeigt werden, um anschließend im zweiten Teil allgemeine Migrations- und Integrationsaspekte von Einwandererminderheiten zu veranschaulichen. Im dritten und vierten Teil illustrieren einige Minderheitenbeispiele in Ost- und Westeuropa die Problematik ausschnitthaft und ermöglichen verschiedene Perspektiven auf die Auseinandersetzung zwischen Integration und Selbstbestimmung.

As one of the world's largest and most bio-diverse countries, India's approach to environmental policy will be very significant in tackling global environmental challenges. This book explores the transformations that have taken place in the making of environmental policy in India since the economic

liberalization of the 1990s. It investigates if there has been a slow shift from top-down planning to increasingly bottom up and participatory policy processes, examining the successes and failures of recent environmental policies. Linking deliberation to collective action, this book contends that it is crucial to involve local actors in framing the policies that decide on their rights and control over bio-resources in order to achieve the goal of sustainable human development. The first examples of large-scale participatory processes in Indian environmental policy were the 1999 National Biodiversity Strategy

This book explores these landmark policies, exploring the strategies of advocacy and deliberation that led to both the successes and failures of recent initiatives. It concludes that in order to deliberate with the state, civil society actors must engage in forms of strategic advocacy with the power to push agendas that challenge mainstream development discourses. The lessons learnt from the Indian experience will not only have immediate significance for the future of policy making in India, but they will also be of

## An Introduction to the Policy Process

Comparative E-Government examines the impact of information and communication technology (ICT) on governments throughout the world. It focuses on the adoption of e-government both by comparing different countries, and by focusing on individual countries and the success and challenges that they have faced. With 32 chapters from leading e-government scholars and practitioners from around the world, there is representation of developing and developed countries and their different stages of e-government adoption. Part I compares the adoption of e-government in two or more countries. The purpose of these chapters is to discern the development of e-government by comparing different countries

and their individual experiences. Part II provides a more in-depth focus on case studies of e-government adoption in select countries. Part III, the last part of the book, examines emerging innovations and technologies in the adoption of e-government in different countries. Some of the emerging technologies are the new social media movement, the development of e-participation, interoperability, and geographic information systems (GIS).

Ist ein „deutsches Europa“ die bittere Frucht der europäischen Krise? In vielen europäischen Ländern wird es so wahrgenommen. Angela Merkel wird mit Hitler verglichen, die Rede ist von deutscher „Hegemonie“ und einem neuen deutschen „Reich“. Doch Deutschland ist heute ein anderes

Land als im 19. Oder 20. Jahrhundert. Nur – welches? Einmal mehr könnte es zu einer Quelle der Instabilität im Herzen Europas werden. In German Power geht Hans Kundnani der Transformation Deutschlands seit der Vereinigung 1990 nach und stellt sie in den Kontext der deutschen Geschichte vor 1945. Dabei zeigt er Ähnlichkeiten auf und benennt einige Grundkonflikte – zwischen Kontinuität und Wandel, Ökonomie und Politik, Europa und der Welt. Kundnani kommt in seinem provozierenden Essay zu dem unbequemen Schluss, dass die „deutsche Frage“ wieder zurückgekehrt ist – in geoökonomischer Gestalt.

seems not only remote from their daily lives but abhorrent to their personal values. Outside of the rare inspirational politician or social movement, politics is a wasteland of apathy and disinterest. It wasn't always this way. For Americans who came of age shortly after World War II, politics was a field of dreams. Democracy promised to cure the world's ills. But starting in the late seventies, conservative economists promoted self-interest as the source of all good, and their view became public policy. Government's main role was no longer to help people, but to get out of the way of personal ambition. Politics turned mean and citizens turned away. In this moving and powerful blend of political essay and reportage, award-winning political scientist Deborah Stone argues that democracy

depends on altruism, not self-interest. The merchants of self-interest have divorced us from what we know in our pores: we care about other people and go out of our way to help them. Altruism is such a robust motive that we commonly lie, cheat, steal, and break laws to do right by others. "After 3:30, you're a private citizen," one home health aide told Stone, explaining why she was willing to risk her job to care for a man the government wanted to cut off from Medicare. The Samaritan's Dilemma calls on us to restore the public sphere as a place where citizens can fulfill their moral aspirations. If government helps the neighbors, citizens will once again want to help govern. With unforgettable stories of how real people think and feel when they practice kindness, Stone shows that everyday

altruism is the premier school for citizenship. Helping others shows people their common humanity and their power to make a difference. At a time when millions of citizens ache to put the Bush and Reagan era behind us and feel proud of their government, Deborah Stone offers an enormously hopeful vision of politics.

The Dilemmas of Ethnic Policy: A Global Perspective argues that ethnic conflict increases or decreases in relation to changes in the social structure and the location and distribution of political power. Ethnic grievances derive from lack of access to valued resources, and elites play a crucial role in allocating those resources. This book examines the experiences of five countries with a history of ethnic conflict: former

Yugoslavia/Bosnia-Herzegovina, Guyana, Trinidad and Tobago, and the United States. It finds that in many cases, solutions adopted to mitigate ethnic conflict have unintended consequences. Often, supposed solutions confuse cause and effect and in fact worsen ethnic conflict. Attempts to address identity issues by pandering to them often led to further ethnic demands. This book argues that, based on the experiences of the countries under examination, the best course is to adopt policies that encourage alliances between and among ethnic groups.

changes to both domestic and international policies, Africa will not reach the Millennium Development Goals by 2015. While there seems to be a consensus on increasing aid to Africa, donors will undoubtedly favour democratic countries that adopt sound development policies. For development policies to be sound, however, they must not only meet short-term political expediencies, they must also tap the broad knowledge base that is furnished by policy research in Africa, particularly economic research on a continent confronting chronic and crushing poverty. What role does economic research, particularly by African economic researchers, play in the existing process of policy

development in Africa?. This book examines the extent to which policy-makers and political leaders take into account home-grown African research when they formulate policies intended to promote sustainable development. It reveals that there is a disconnect between policy-making and economic research and proposes ways that researchers can help to bridge this gap, improve the policy-making process, and thus enhance development efforts in Africa.

promises to transform how we think about numbers. Contrary to what you learned in kindergarten, counting is more art than arithmetic. In fact, numbers are just as much creatures of the human imagination as poetry and painting; the simplest tally starts with judgments about what counts. In a nation whose Constitution originally counted a slave as three-fifths of a person and where algorithms disproportionately consign Black Americans to prison, it is now more important than ever to understand how numbers can be both weapons of the powerful and tools of resistance. With her "signature brilliance" (Robert Kuttner), eminent political scientist Deborah Stone delivers a "mild-altering" work (Jacob

Affordability, access, and accountability have long been among the central challenges facing higher education -- and they remain so today. Here, Donald E. Heller and other higher education scholars and practitioners explore the current debates surrounding these key issues. As students and their families struggle to meet rising tuition prices, and as state funding for higher education dwindles, policymakers confront issues of affordability within state and institutional budgets. Changing demographics and

challenges to affirmative action complicate the admissions process even as colleges and universities seek to diversify enrollments. And issues of institutional accountability have forced the restructuring of higher education governing boards and a reexamination of the role of public trustees in governance. This collection analyzes how issues of affordability, access, and accountability influence the way in which state governments approach, monitor, and set public higher education policy. The contributors examine the latest research on pressing challenges, explore how states are coping with these challenges, and consider what the future holds for public postsecondary education in the United States.
