This book is driven by forty years of study on 1700 years of Christian violence. The historical section, Part 1, opens with, "Christianity is the most homicidal religion in the history of the world...Half a Billion men, women, children, infants, elderly, sick, and disabled slain." You read how Christians were and are taught to obey their governments more than Jesus Christ, whether killing as soldiers, torturing for governments, or harming innocent citizens as police. You read the words of Christian European Kings, Queens, and Popes to their Christian explorers sent into world, "Discover, subdue, and conquer."

Shortly before his assassination, Martin Luther King Jr. called for a radical redistribution of economic and political power to transform the whole of society. In 1967, he envisioned and designed the Poor People's Campaign, an interracial effort that was carried out after his death. This campaign brought together impoverished Americans of all races to demand better wages, better jobs, better homes, and better education. King and the Other America explores this overlooked and obscured episode of the late civil rights movement, deepening our understanding of King's commitment to social justice and also of the long-term trajectory of the civil rights movement. Digging into earlier radical arguments about economic inequality across America, which King drew on throughout his entire political and religious life, Sylvie Laurent argues that the Poor People's Campaign was the logical culmination of King's influences and ideas, which have had lasting impact on young activists and the public. Fifty years later, growing inequality and grinding poverty in the United States have spurred new efforts to rejuvenate the campaign. This book draws the connections between King's perceptive thoughts on substantive justice and the ongoing quest for equality for all.

Showing how King's life and legacy played--and continue to play--a profound role in the liberation of South Africa from apartheid, this work draws on King's private letters and published works to connect his life and thought with that of South African leaders. A brilliant testament to the global influence of King.

Martin Luther King Jr. had a dream that, one day, all people would be viewed equally, no matter the color of their skin. And he fought hard for civil rights for African Americans, eventually even giving his life to the cause. This compelling biography explores King's early life and his activism in his own words within the context of the Jim Crow American South, along with his victories and the way in which he changed our world. Students will be guided through their reading with a glossary of important terms, a timeline of King's life and important events in the civil rights movement, and resources for further learning.

This book examines how and why, in the context of International Relations, children's subjecthood has all too often been relegated to marginal terrains and children themselves automatically associated with the need for protection in vulnerable situations: as child soldiers, refugees, and conflated with women, all typically with the accent on the Global South. Challenging us to think critically about childhood as a technology of global governance, the authors explore alternative ways of finding children and their agency in a more central position in IR, in terms of various forms of children's activism, children and climate change, children and security, children and resilience, and in their inevitable role in governing the future. Focusing on the problems, pitfalls, promises, and prospects of addressing children and childhoods in International Relations, this book places children more squarely in the purview of political subjecthood and hence more centrally in IR.

Der Neoliberalismus ist in aller Munde. Gerne wird ihm alles Krisenhafte in der globalen Ökonomie angelastet, jüngst auch die neue Instabilität der westlichen Demokratien. Zu Recht? Im Mittelpunkt der Studie stehen vier neoliberale Ökonomen der ersten Stunde: Walter Eucken, Friedrich August von Hayek, Ludwig von Mises und Wilhelm Röpke. Ihre Ordnungsentwürfe von Wirtschaft und Gesellschaft enthalten unterschiedliche Rollen für den Staat. Diese Staatsverständnisse werden in drei Vergleichen zueinander in Beziehung gesetzt und um ihr jeweiliges Gravitationszentrum strukturiert. Jeder Vergleich besteht aus zwei Ebenen: Zunächst werden abstrakte Leitbilder für die Rolle des Staates herausgearbeitet, anschließend werden diese mit vier Feldern der konkreten Wirtschaftspolitik verknüpft. Dieser Zugang soll die vier Neoliberalen entmystifizieren und es den gegenwärtigen Krisendiskursen ermöglichen, von ihren Ideen zu profitieren. Das Buch richtet sich an Dozenten und Studierende der Volkswirtschaftslehre, der Politikwissenschaft, der politischen Philosophie und der Wirtschaftssoziologie sowie an jeden Bürger, der inmitten der neuen Fragilität des Westens nach polit-ökonomischen Denkkimpulsen sucht.

Everyone does research. Some just do it better than others. In this chaotic world of information and misinformation, referred to as "information fog," university students, in particular, need to learn how to conduct research effectively. Good research is about a quest to discover more, about a burning desire to solve society's problems and make a better world. Ultimately, research is a way forward to a resolution of life's greatest difficulties. In this seventh edition of Research Strategies: Finding Your Way through the Information Fog, author William Badke walks you step by step through the entire research process—from choosing a topic, to writing the final project, and everything in between. A seasoned researcher and educator, Badke offers tried-and-true tips, tricks, and strategies to help you identify a problem, acquire pertinent information, and use that information to address the problem. Employing a host of examples and humor, Research Strategies: Finding Your Way through the Information Fog shows how research can be exciting and fun.

Becoming Teachers of Inner-city Students takes on the continuing challenges of White teachers in increasingly de facto re-segregated schools of the present. Drawing on the author's eighteen years of experience as a classroom teacher and his research on White teachers of inner-city students, Becoming Teachers provides key discussions on professional identity for preservice teachers, professional educators, and researchers interested in diversity education or urban education. Driving at complex recognitions of race, class, culture, language, and gender as a basis for teaching and learning with diverse urban students, the author's and other White teachers' life and teaching stories move beyond prescriptive models of professional identity for preservice and professional teachers to "follow." Instead, life and teaching stories in Becoming Teachers demonstrate again and again that in teaching the personal is political, professional knowledges are forged in practice, and—overall—that becoming a professional teacher is a process that draws on one's experiences and inner-most convictions. Becoming Teachers, updating Vivian Paley's White Teacher and reworking Christine Sleeter's multicultural research on White teachers' race-evasive identities, moves discussions on White teacher identity toward a second wave of race-visible professional identity for White teachers in the present. James Jupp's book is an instruction on how to keep the democratic educational experiment on the workbench...—Roger Slee, Professor and Director of the Victoria Institute for Education, Diversity, and Life Long Learning at Victoria University, Melbourne James Jupp thoughtfully explicates the complexity of the social justice literature in education related to race, class, culture, language, gender and other differences in classrooms. Jupp is one of the leading scholars in education who challenges static notions of difference and opens up new curriculum spaces for a second wave of critical race work. Challenging the field to consider more nuanced possibilities that will advance social justice in the present, Jupp provides generous readings for new intercultural alliances. Jupp's Becoming Teachers of Inner-city Students offers a fresh understanding for those who are looking for new ways to understand teachers' lives and professional identities.—Patrick Slattery, Professor of Curriculum, Texas A&M University Jupp does the hard work, here, of understanding where we have been in conceptualizing the racial identities of White teachers. And then he does something harder. With abundant intelligence, courage, and generosity, Jupp opens up new pathways for our thinking and feeling and action. "A major contribution to the literature on changing US regionalism, the volume is handsomely produced and thoroughly documented." --Choice "... useful and well researched..." --American Politics Review "This is an excellent book for use in the course on comparative urban development... It is a book that should be read by any urbanist who believes that a historical orientation is the best prelude for understanding the future of urban development into the 21st century." --Urban Studies Specialists in urban history and urban affairs join forces to compare the recent political histories of twelve major northeastern and midwestern cities. These excellent essays delineate intricate patterns of political competition among leaders of competing groups, who generally agree on a pro-business, pro-growth agenda, as in the Sunbelt. The realtive power of nonbusiness groups, however, sets these northern cities apart from those of the Sunbelt and has formed the basis of the Snowbelt's postwar politics.

Logical Argument in the Research Paper operate son the premise that collegiate-level writing, when cast in its most significant and sophisticated form, is argumentative. Students are shown how writers examine a potential topic, establish a stance upon that topic, defend the stance, avoid reasoning and ethical rrors, and in general say something meaningful about the topic. It also includes instruction about finding sources, gathering information from them, and correctly documenting them. However, the emphasis remains on how effective writers evaluate sources, think about the information they discover, prepare a fair and informed argument, rethink and revise the argument, and finally present an argument in its completed form. Logical Argument in the Research Paper will help students learn some of the reasoning processes that all writers use when composing the academic argument.

Martin Luther King Jr. is a name with which everyone in the USA is very familiar. " I have a Dream " , is the famous speech he rendered before thousands of people in Birmingham, Albania. His dream was to get Civil Rights for the African-American people, who were until then treated as unequal. He had the courage to stand up to his conviction that people should not be discriminated because of the colour of their skin. He was a very religious man; a true man of God. Inspired by Mahatma Gandhi ' s activism, he fought for the Civil Rights of the people through non-violence. Through his Civil Rights activism, he helped pass the Civil Rights Act of 1964 and the same year he received the Nobel Peace Prize. An inspiring real life story of the great man.

Thomas Weber's book comprises a series of biographical reflections about people who influenced Gandhi, and those who were, in turn, influenced by him. Whilst previous literature tended to focus on Gandhi's political legacy, Weber's book explores the spiritual, social and philosophical resonances of these relationships, and it is with these aspects of the Mahatma's life in mind, that the author selects his central protagonists. These include friends such as Henry Polak and Hermann Kallenbach, who are not as well known as those usually cited, but who left a deep impression nevertheless, and motivated some of Gandhi's major life changes. Conversely, the work of luminaries such as E. F. Schumacher and Gene Sharp reveal the Mahatma's influence in arenas which are not traditionally associated with his thinking. Weber's book offers intriguing insights into the life and thought of one of the most significant figures of the twentieth century.
