Statistics of divorce are included beginning with 1882.

In this study, we look at the potential for development leaps in Africa in three key sectors that provided the basis for socioeconomic development around the world: health, education and agriculture. Advances in these sectors increase the human capital, create jobs and economic opportunities and have a positive influence on each other. Healthy and well-fed children can learn better; hygiene and better medical care diminish infant mortality, which

reduces the desire for a large number of children; education for women promotes gender equality and causes birth rates to fall further. This creates a population structure under which the economy can grow particularly well: a demographic dividend becomes possible.

ASP.NET web platform. It provides a high-productivity programming model that promotes cleaner code architecture, test-driven development, and powerful extensibility, combined with all the benefits of ASP.NET. ASP.NET MVC 5 contains a number of advances over previous versions, including the ability to define routes using C# attributes and the ability to override filters. The user experience of building MVC applications has also been substantially improved. The new, more tightly integrated, Visual Studio 2013 IDE has been created specifically with MVC application development in mind and provides a full suite of tools to

The popular Bootstrap JavaScript library has also now been included natively within MVC 5 providing you, the developer, with a wider range of multi-platform CSS and HTML5 options than ever before without the penalty of having to load-in third party libraries.

It should have been a time for healing and rebirth... Forced to leave an earth devastated by the spread of Dark Energy, humans of the future head for the planet Zarmina to build a new life. But soon after their arrival, they are faced with another threat to their

existence: syconoids. Created first as a unique convergence of thought when hybrid Stella, a cyborg with a human brain, accesses a network of computers back on Earth, this new form of artificial intelligence sees itself as a distinct race that needs to replicate and expand. Using the left-behind humanoid factories on Earth, this communal intelligence creates a physical manifestation of itself—fully sentient, free-thinking syconoids with a superior intellect and body design—and sets out to become the dominant force in the universe. Yet the syconoids soon discover they still need humans for one thing: the brains of newborns so they can take their own evolution to

a completely new level. While Stella tries to fulfill the unwilling role cast upon her as the “mother” of a new race and still protect her human and hybrid friends, she attempts to convince the syconoids to live peacefully on Zarmina. But when they resist, she finds herself having to make a very difficult choice. In this final book of the Retrogress Trilogy, Conner’s exciting plot explores very real issues around the dangers of technology and artificial intelligence and raises the burning questions of what exactly makes us human, and whether we will survive ourselves.

For centuries, the writ of habeas corpus has served as an important safeguard against miscarriages of justice, and today it remains at the center of some of the most contentious issues of our time—among them terrorism, immigration, crime, and the death penalty. Yet, in recent decades, habeas has been seriously abused. In this book, Nancy J. King and Joseph L. Hoffmann argue that habeas should be exercised with greater prudence. Through historical,
