face of Thatcher government hostility, and to adapt to enormously powerful forces of economic restructuring which have also been encouraged by government policies. The key aspects of these changing fortunes of British towns explored in this important new book is the ability of individual localities to exercise any control over their own growth and decline. *Place, Policy and Politics* examines local political initiatives seeking to influence economic and social development in seven sharply contrasting localities, ranging from the outer council estates of Merseyside to the boom towns of Cheltenham and Swindon. Throughout their

analysis, the contributors, drawn from a wide range of social science disciplines, address the vital questions in the debate over local policy initiatives, including: * To what extent are localities able to harness trends in the national and international economy to provide jobs and a better standard of living for their inhabitants? * Why do local authorities vary in their capacity to initiate economic policy? * To what extent do national urban and other policies inhibit or encourage their efforts? * How might central government modify its policies to facilitate the prospering of localities?

addressing the role of myth, and now it is time that social historians of sport also examined it. The contributors to this collection of essays explore the symbolic meanings that have been attached to sport in Europe by considering some of the mythic heroes who have dominated the sporting landscapes of their own countries. The ambition is to understand what these icons stood for in the eyes of those who watched or read about these vessels into which poured all manner of gender, class and patriotic expectations.

From the latter, examples include Frank Eatons first ever five goals in one match, the great Tommy Taylors hat-trick in only his second appearance for the club and a brilliant individual performance by Arthur Kaye. His open and friendly nature meant that others were naturally drawn to him and he always had time to get to know anyone and everyone. Perhaps because of this, George Best reached so many people. So much about the society that is now emerging in the twenty-first century bears an astonishing resemblance to the most prominent features of what we call the classical world - its institutions, its priorities, its entertainment, its physics, its sexual morality, its food, its politics, even its religion. The ways in which we live our rich and varied lives correspond - almost eerily so - to the ways in which

the Greeks and Romans lived theirs. Whether we are eating and drinking, bathing or exercising or making love, pondering, admiring or enquiring, our habits of thought and action, our diversions and concentrations recreate theirs. It is as though the 1500 years after the fall of Rome had been time out from traditional ways of being human. This eye-opening book makes us look afresh at who we are and how we got here. Full Circle is not only wonderfully

witty and brilliantly astute, but also profound and often disquieting.

Ferdinand Mount effortlessly peels back 2000 years of history to show how much we are like the ancients, how in ways both trivial and crucial we are them and they are us.
