Der Heidelberger Assyriologe Stefan M. Maul legt hier eine neue Übersetzung des Gilgamesch-Epos vor. Spektakuläre Textfunde, die in diesem Buch erstmals bekannt gemacht werden, und behutsam vorgenommene Ergänzungen lassen das älteste Werk der Weltliteratur in nie zuvor gesehener Vollständigkeit wiedererstehen. Die elegante und dennoch wortgetreue Übersetzung bewahrt die Sprachgewalt des babylonischen Originaltextes. Der leicht rhythmische Klang der Übertragung lädt zum Deklamieren ein und nähert sich den rhythmischen Versen der Vorlage an. In der allgemeinverständlichen Einführung und den ausführlichen Kommentaren nimmt Stefan M. Maul den Leser mit in die Welt des Alten Orients und erläutert ihm die politischen, gesellschaftlichen und religiösen Vorstellungen der Kultur, die das Gilgamesch-Epos hervorgebracht hat. Das Epos erzählt den Mythos des Königs Gilgamesch von Uruk, der seine Kräfte mit der ganzen Welt messen will, nach der Unsterblichkeit strebt und schließlich auf die Erkenntnis zurückgeworfen wird, daß auch für ihn das Leben endlich ist. Bis Gilgamesch bereit ist, diese Lehre anzunehmen, und dadurch die Fähigkeit erwirbt, ein guter Herrscher zu sein, muß er zahllose Abenteuer bestehen. Das Gilgamesch-Epos ist so einem modernen Entwicklungsroman vergleichbar, der von den Grundfragen des menschlichen Daseins handelt.

"Creativity used to be the difficult concept to define - now it has probably been overtaken by the concept 'creative industries'. However, this text does a sterling job at identifying, outlining and defining the many elements that go to make up this booming sector of industry. What makes it particularly interesting is that it includes the view of the creative industries from the perspective of working in it, then the definitions of what products and producers are involved, and ends with the broader picture of the creative economy and predictions for future trends. Add to this that they include both theory and practice, and this really is an all-round guide to the vast domain that is loosely titled 'the creative industries'" - *Angela Birchall, School of Media, Music & Performance, Salford University This is your complete guide to studying and succeeding in the creative industries. Der Zukunftsforscher und preisgekrönte Wissenschaftsjournalist Stephen Petranek erklärt in seinem TED-Book 'Unser Leben auf dem Mars', warum es schon in zwanzig Jahren unumgänglich sein wird, dass Menschen auf dem Mars leben. Er zeigt packend und ganz konkret, wie wir mittels bereits bestehender Technik dorthin kommen können und wie wir schon bald Wasser und Sauerstoff aus unterirdischen Eisvorkommen gewinnen und Gewächshäuser bauen werden, um so die Bedingungen für menschliches Leben auf dem nächsten Verwandten unseres Heimatplaneten zu schaffen. Es wird Leben auf dem Mars geben! Das ist nicht Science-Fiction, die Technologie dafür existiert schon heute.

Myth in the Poetry of Ted Hughes

Elenchus of Biblica

Based loosely on the life of a real person, this story is about a girl who grew up with three strikes against her. She was unwanted, overweight, and plain. The only person who really cared about her was her grandmother, who died when she was a teenager. Like the saying goes, she sought love in all the wrong places. The one constant in her life was her quest for a god, who may or may not be real. And if he was real, did he care about her? Miss Candy Nash takes our heroine from a fourth-grade girl struggling to keep her name to a young woman shaking behind a locked bathroom door while her would-be attacker threatens to drag her by her hair to his bed. Does God care? Will he deliver her from the nightmare she finds herself in?

Entrepreneur and media mogul Ted Turner has commanded global attention for his dramatic personality, his founding of CNN, his marriage to Jane Fonda, and his company’s merger with Time Warner. But his green resume has gone largely ignored, even while his role as a pioneering eco-capitalist means more to Turner than any other aspect of his legacy. He currently owns more than two million acres of private land (more than any other individual in America), and his bison herd exceeds 50,000 head, the largest in history. He donated \$1 billion to help save the UN, and has recorded dozens of other firsts with regard to wildlife conservation, fighting nukes, and assisting the poor. He calls global warming the most dire threat facing humanity, and says that the tycoons of the future will be minted in the development of green, alternative renewable energy. Last Stand goes behind the scenes into Turner’s private life, exploring the man’s accomplishments and his motivations, showing the world a fascinating and flawed, fully three-dimensional character. From barnstorming the country with T. Boone Pickens on behalf of green energy to a pivotal night when he considered suicide, Turner is not the man the public believes him to be. Through Turner’s eyes, the reader is asked to consider another way of thinking about the environment, our obligations to help others in need, and the grave challenges threatening the survival of civilization.

On the eve of WWII, an international plot leads to a deadly obsession: “Nobody tells a story better than Thomas H. Cook” (Michael Connelly, New York Times–bestselling author of Two Kinds of Truth). It’s 1939 and the world is on the brink of war, but Thomas Danforth is in New York City living a fortunate life. The well-traveled son of a wealthy importer, he’s in his twenties and running the family business, looking forward to a bright future. Then, during a snowy evening walk along Gramercy Park, a friend makes a fateful request—and involves Thomas in a dangerous idea that could change the fates of millions. Thomas is to provide access to his secluded Connecticut mansion, where a mysterious woman will receive training in firearms and explosives. Thus begins an international plot carried out by the strange and alluring Anna Klein—a plot that will ensnare Thomas in more ways than one. When it all goes wrong and Anna disappears, he will travel far from home once again, but this time, into a war-torn world that is far more dangerous, in this story by an Edgar Award–winning author known for his “piercing thrillers” (New York Daily News). “No other suspense writer takes readers as deeply into the heart of darkness as Thomas H. Cook.” —Chicago Tribune

The true story of a 1984 murder and the lengths one man went to in order to achieve justice for his brother's killing. The moment he found out his brother was missing and presumed dead, Ted Kergan launched a relentless effort to bring two suspected killers—a teenage prostitute and her much older grifter boyfriend—to justice and find Gary Kergan's body. Little did he know his quest would consume a fortune and take thirty years to reach its conclusion. Thwarted at first by the fact that his brother's body could not be located and a new district attorney was therefore reluctant to prosecute, Kergan had to keep track of the killers from New Orleans's notorious French Quarter to Las Vegas and points in between, waiting for a break in the case that seemed like it would never come. Then nearly thirty years later, science, detective work, and a brother's love and tenacity would combine for a resolution that would end in a dramatic trial in which a killer's diary would be a star witness. “A tremendous story of love and murder, faith and tenacity.”—Steve Jackson, New York Times–bestselling author of A Clockwork Murder “A deeply moving story of powerful devotion.”—Anthony Flacco, New York Times–bestselling author of A Checklist for Murder

An essential behind-the-scenes foray into the world of cutting-edge memory research that unveils findings about memory loss only now available to general readers. When Sue Halpern decided to emulate the first modern scientist of memory, Hermann Ebbinghaus, who experimented on himself, she had no idea that after a day of radioactive testing, her brain would become so “hot” that leaving through the front door of the lab would trigger the alarm. This was not the first time while researching Can’t Remember What I Forgot, part of which appeared in The New Yorker, that Halpern had her head examined, nor would it be the last. Halpern spent years in the company of the neuroscientists, pharmacologists, psychologists, nutritionists, and inventors who are hunting for the genes and molecules, the drugs and foods, the machines, the prosthetics, the behaviors and therapies that will stave off Alzheimer’s and other forms of dementia and keep our minds-and memories-intact. Like many of us who have had a relative or friend succumb to memory loss, who are getting older, who are hearing statistics about our own chances of falling victim to dementia, who worry that each lapse of memory portends disease, Halpern wanted to find out what the experts really knew, what the bench scientists were working on, how close science is to a cure, to treatment, to accurate early diagnosis, and, of course, whether the crossword puzzles, sudokus, and ballroom dancing we’ve been told to take up can really keep us lucid or if they’re just something to do before the inevitable overtakes us. Beautifully written, sharply observed, and deeply informed, Can’t Remember What I Forgot is a book full of vital information-and a solid dose of hope.

"Imperiled Destinies" examines the evolution of Daoist beliefs about human liability and redemption over eight centuries and outlines ritual procedures for rescuing an ill?starred destiny. From the second through the tenth century CE, Daoism emerged as a lit engaged vigorously with Buddhism and transformed Chinese thinking about suffering, the nature of evil, and the aims of liberation. In the fifth century, elements of classical Daoism combined with Indian yogic practices to interiorize the quest for deliverance portrays a world engulfed by evil, where human existence was mortgaged from birth and burdened by increasing debts and obligations in this world and the next. Against this gloomy outlook, Daoism offered ritual and sacramental instruments capable of act providing therapeutic relief and ecstatic release from apprehensions of death, disease, war, spoilt harvests, and loss. Drawing on prayer texts, liturgical sermons, and experiential narratives, Franciscus Verellen focuses on the Daoist vocabulary of bondage and meanings of sacrifice, and metaphoric conceptualizations bridging the visible and invisible realms. The language of medieval supplicants envisaged the redemption of an imperiled destiny as debt forgiveness, and deliverance as healing, purification, release, or e into light.

From the moment Captain America punched Hitler in the jaw, comic books have always been political, and whether it is Marvel’s chairman Ike Perlmutter making a campaign contribution to Donald Trump in 2016 or

Marvel's character Howard the Duck running for president during America's bicentennial in 1976, the politics of comics have overlapped with the politics of campaigns and governance. Pop culture opens avenues for people to declare their participation in a collective project and helps them to shape their understandings of civic responsibility, leadership, communal history, and present concerns. Politics in the Gutters: American Politicians and Elections in Comic Book Media opens with an examination of campaign comic books used by the likes of Herbert Hoover and Harry S. Truman, follows the rise of political counterculture comix of the 1960s, and continues on to the graphic novel version of the 9/11 Report and the cottage industry of Sarah Palin comics. It ends with a consideration of comparisons to Donald Trump as a supervillain and a look at comics connections to the pandemic and protests that marked the 2020 election year. More than just escapist entertainment, comics offer a popular yet complicated vision of the American political tableau. Politics in the Gutters considers the political myths, moments, and mimeses, in comic books—from nonfiction to science fiction, superhero to supernatural, serious to satirical, golden age to present day—to consider how they represent, re-present, underpin, and/or undermine ideas and ideals about American electoral politics.

Das Leben aus vollem Herzen leben In einer Welt, die so schnellebig und flüchtig ist, in einer Zeit der Heimatlosigkeit und emotionalen Entwurzelung, ist es umso wichtiger zu wissen, wo wir hingehören und woran wir uns festhalten können. Die renommierte Psychologin Brené Brown zeigt, dass innere Stärke der Raum ist, wo Liebe, Zugehörigkeit, Freude und Kreativität entstehen. Unter ihrer behutsamen Anleitung entdecken wir unsere innere Verwurzelung neu und entwickeln eine kraftvolle Vision, die uns ermutigt, Großes zu wagen.

What is the relationship between design, sustainability, inner values and spirituality? How can we create designs that provide a convincing alternative to unsustainable interpretations of progress, growth, consumerism and commercialism? Building on the arguments first advanced in his widely acclaimed books Sustainable by Design and The Spirit of Design, Stuart Walker explains how we can achieve the systemic changes needed to address the challenges of sustainability. Challenging common assumptions about the nature of our contemporary material culture and its relationship to human flourishing, the author introduces approaches to design that draw inspiration from nature, summon the human imagination and create outcomes which are environmentally responsible and socially just, as well as meaningful and enriching at a personal level. Offering a unique and original contribution to this vital debate, Designing Sustainability is destined to become essential reading for students on courses in design and sustainability and for design practitioners looking for a deeper, more meaningful basis for their work.

"Based on a thorough analysis of the imagery and inscriptions of seven stelae erected in the Great Plaza at Copan, Honduras, by the Classic Period ruler 18-Rabbit-God K, this study argues that stelae were erected not only to support a ruler's temporal claims to power but more importantly to express the fundamental connection in Maya worldview between rulership and the cosmology inherent in their vision of cyclical time. After an overview of the archaeology and history of Copan and the reign and monuments of 18-Rabbit-God K, Elizabeth Newsome interprets the iconography and inscriptions on the stelae, illustrating the way they fulfilled a coordinated vision of the king's ceremonial role in Copan's period-ending rites. She also links their imagery to key Maya concepts about the origin of the universe, expressed in the cosmologies and mythic lore of ancient and living Maya peoples." "Because previous scholarship has never assigned all seven monuments to a single period or the patronage of one ruler, the uniqueness of Newsome's study lies in the way it explicates the overall meaning and function of the stela series with respect to the long-term activities and agendas of one king."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
