NASA research of Earth-Moon mechanics by astrophysicist Robert Newton leads mathematicians of MSU to a breakthrough in the chronology of civilization and China. Early history of China up until the XV century A.D. is in fact the history of Europe and the Mediterranean region, Byzantium in particular. European chronicles had been transplanted to China in the 14-15th century A.D. the earliest. Today it is considered that the construction of the Great Wall of China began in the 3rd century B.C., allegedly as a protection against northern nomads. But the construction of such fortifications could not begin before the invention of cannons and siege weapons, that is approximately the 15th century A.D. The authors give a brief description of the real situation with Chinese and Russian history and chronology. The authors don't claim that their reconstruction is complete. The work on the reconstruction of the walled China has only just begun.

Taken together they illuminate Kafka's life and art by presenting works for the first time in the sequence in which they were written and drawing directly on his manuscripts. Here are the major short pieces left by Kafka and published after his death, including The Great Wall of China, Blumfeld, an Elderly Bachelor, Investigations of a Dogand his great sequences of aphorisms, with fables and parables on subjects ranging from the legend of Prometheus to the Tower of Babel. Allegorical, disturbing and possessing a dream-like clarity, these writings are quintessential Kafka.

"This territory is occupied by wandering tribes of heathen, who eat such people as they can catch, and for this reason no one enters their country or attempts to travel there. I saw nobody in this city who had been to the Great Wall, or who knew anybody who had been there." - Ibn Batuta, Moroccan explorer, c. 1345 The Great Wall of China is perhaps the wonder of the world that has most captured the human imagination, and as the quotes about it indicate, the wall has acquired special significance even outside of China. The places and ways in which it has taken hold vary greatly, but one thing is certain: the Great Wall of China is as amazing as it is mysterious, and it's as mundane as it is magical. Naturally, the Wall has become the most recognizable symbol of China, used for both aggrandizement and criticism. Nationalists see it as a symbol of China's peaceful nature, engineering capability, and historic longevity, while detractors see the Wall as the embodiment of China's backwardness, closed-mindedness, and hubris. While history allots arguments for the claims of each side, both of them are colored by Great Wall mythology and current geopolitical concerns. Though the wall can symbolize all of these things about China, it is important to remember that the many long walls, upon some of which the current landmark was constructed, were put up by specific people for specific purposes. The first step to a more accurate conception of the Wall is getting a better understanding of its name, because "The Great Wall of China" is a misleading label. More accurately, it may be called the "Great Walls of China," for several dynasties beginning early in Chinese history built fortifications of some kind, usually to the north. These constructions were alternately expanded, connected, dismantled, or neglected, depending on the circumstances and preferences of those in charge. In fact, the Chinese name wan li chang cheng gets closer to capturing the true nature of the wall(s). The name literally means 10,000-1/2 kilometers-long-wall, because 10,000 in Chinese is often shorthand for "many." The walls, measured separately and added up, actually span over 21,000 kilometers (13,000 miles), according to a 2007 government survey, a figure that includes all the known walls from all the dynasties without regard to current condition (even walls that have not stood for centuries were included). What this number explains more than anything is that the story of the Great Wall is very complex and closely tied to the whole of Chinese history, so parsing fact from fiction and rumor is tricky. The Great Wall of China: The History of China's Most Famous Landmark comprehensively looks at the history behind the wall and its construction. Along with pictures, you will learn about the Great Wall like never before, in no time at all.***

Brief History Of The Great Wall Of China Since Ancient Times: History Of The Great Wall

Nomadic-Chinese Interaction Through Two Millennia

This edition contains the English translation and the original text in German. "The Great Wall of China" ("Beim Bau der Chinesischen Mauer") is a short story written by Franz Kafka in 1917. It was not published until 1931, seven years after his death. Max Brod selected stories and published them in the collection "Beim Bau der Chinesischen Mauer". Contained within the story is a parable that was separately published as "A Message from the Emperor" ("Eine kaiserliche Botschaft") in 1919 in the collection "Ein Landarzt" ("A Country Doctor"). Some sub-themes of the story include why the wall was built (pieces in many different places), the relationship of the Chinese with the past and the present and the emperor's imperceptible presence. The story is told in first person by an older man from a southern province. The first English translation by Willa and Edwin Muir was published by Martin Secker in London in 1933. It appeared in "The Great Wall of China. Stories and Reflections" (New York: Schocken Books, 1946). "Beim Bau der Chinesischen Mauer" ist eine fragmentarische Erzählung von Franz Kafka, die 1917 entstand und postum veröffentlicht wurde. Sie schildert die Hinwendung des kollektiven Volkes an den Bau der Großen Mauer und deren Mystifizierung. Außerdem werden eine fast allwissende Führerschaft und ein sehr ferne Kaisertum skizziert. Eingebettet in diese Erzählung ist eine Parabel, die, als "Eine kaiserliche Botschaft" bezeichnet, eine eigenständige Geschichte darstellt und im Rahmen des Bandes Ein Landarzt veröffentlicht wurde. Unter dem Titel "Beim Bau der chinesischen Mauer" hat Kafkas Freund Max Brod 1931 den ersten Band von Kafkas Prosa aus dem Nachlass herausgegeben.

This fascinating book tells the story of the centuries-long confrontation along the Great Wall of China.

"China is so big and so diverse that, as in the proverbial blind man touching an elephant, contemporary descriptions that vary dramatically can all be true. Few visitors to glittering Shanghai or Shenzhen, for example, will get any impression of the gaping gray maw of the government's prison camp system that Philip Williams and Yenna Wu, basing themselves on a vast range of Chinese sources, illuminate in erudite detail. The authors look at every facet of the camps, place them within China's historical tradition, and compare them with modern analogues. Through "a feel" for the deadening world of the camps"—Perry Link, author of The Uses of Literature: Life in the Socialist Chinese Literary System "The Great Wall of Confinement deals with issues ranging from the legal grounding—or the lack of any—of the Chinese concentration camp system, to its technical implementation, its discursive manifestation, and its physical as well as psychological impact. A book like this is long overdue. With this work, Williams and Wu have made an important contribution to the fields of Chinese legal and literary studies."—David Der-wei Wang, author of The Great Wall of Confinement is an excellent book. It synthesizes an already significant corpus of writings on Chinese prisons and labor camps, marshals an array of literary sources as essential historical source materials, and compares the literature of Chinese incarceration with its Soviet and European counterparts. The value of this important study stems equally from its tone—a rare combination of a level-headed quality with a very fine sensitivity to the human tragedy recounted in this literature."—Jean-Luc Domenach, author of Ou va la Chine? (Where does China Go? part of the veil on China's long lasting tragedy: the use of imprisonment, torture, forced labor against its citizens, whether criminals, feeble minded or simply political opponents. The angle is new: the question is to find out how Chinese have written on this subject, whether in fiction or reportage, the way they went about telling their stories, how much they said, or withheld. Through Philip Williams and Yenna Wu's thought-provoking analysis of such writings, of the cultural origins of forced labor and imprisonment in imperial and Communist China, one comes to of the best kept secrets of our planet!"—Marie Holzman, President of the Association Solidarité Chine

The Great Wall of China is a series of fortifications that were built across the historical northern borders of ancient Chinese states and Imperial China as protection against various nomadic groups from the Eurasian Steppe. The history of China up until the XV century A.D. is, in fact, the history of Europe and the Mediterranean region, Byzantium in particular. Historical chronicles telling us about Europe were transplanted to China by the Jesuits in the XVI-XVII century A.D. the earliest. Today it is considered that the construction of the Great Wall of China began in the III century B.C., allegedly as protection against northern nomads. The argument that the wall had been repaired during those two thousand years is dubious.

This is the first full scholarly study of the Great Wall of China to appear in any language, and it challenges many deeply held ideas about Chinese history. Drawing both on primary sources and on the latest archaeology, the book first demonstrates that the standard account of the Great Wall is untrue and misleading and then presents a convincing new account. It begins by tracing the various walls and systems of frontier defenses that existed in early Chinese history, and shows how the greatest of these achieved a mythical symbolic stature which long survived the Wall itself. A striking concluding chapter traces how the true history of the Wall was lost in the early twentieth century as it was gradually transformed into a Chinese national symbol explained through historical myth. The book is an important contribution to the history of China's defensive policy, and her ideological attitudes, and will be of interest both to students of Chinese history and of international relations in the pre-modern world.

Describes the Great Wall of China, including how and why it was built, the dynasties behind its construction, what it was used for, and what it's like today.
