Despite the fact that there are around 1.2 million powered two wheelers (PTWs) within the United Kingdom, riders are often misconceived as living at the edge of society; however, this is often far from the truth. Riding a PTW is a high-risk activity and those who ride are often perceived as being ‘risk junkies’, but through an in-depth exploration of this leisure activity, Motorcycling and Leisure explains that riders ride because they enjoy it and do not necessarily enjoy the risk involved. The book presents a range of contemporary research on riders and how they find enjoyment. The book further explores the rider goal of enjoyment and utilises Fuller’s task homeostasis theory along with Giskszentmihalyi’s theory of flow to develop an understanding of the interaction between risk and goals. In conclusion it develops principles of interventions with the aim of guiding intervention design and reducing the number of motorcycle crashes.

What happens to gender at 120mph? Are Harley-Davidsons more masculine than Yamahas? The Gendered Motorcycle answers such questions through a critical examination of motorcycles in film, advertising and television. Whilst bikers and biker cultures have been explored previously, the motorcycle itself has remained largely under-theorised, especially in relation to gender. Esperanza Miyake reveals how representations of motorcycles can produce different gendered bodies, identities, spaces and practices. This interdisciplinary book offers new and critical ways to think about gender and motorcycles, and will interest scholars and students of gender, technology and visual cultures, as well as motorcycle industry practitioners and motorcycle enthusiasts.

This book examines the role of popular culture in the construction of gendered identities in contemporary society. It draws on a wide range of popular cultural forms - including popular music, newspapers and television - to illustrate how femininity and masculinity are produced, represented and consumed. The authors blend primary and secondary research to offer the reader a balanced yet novel overview of the area. Students are introduced to key theories and concepts in the fields of gender studies and popular culture, which are made accessible and interesting through their application to topical examples such as D.V.s, binge drinking and computer games. The book is structured into three clear, user-friendly sections: 1. Production, gender and popular culture: An investigation of who produces popular culture, why gendered patterns occur, and how they impact on content. 2. Representation, gender and popular culture: An examination of how men and women are represented in contemporary popular culture, and how notions of (in)appropriate femininity and masculinity are constructed. 3. Consumption, gender and popular culture: An exploration of who consumes what in popular culture, how gendered consumption relates to identity, and what the representations of gender are. Gender and Popular Culture will be essential reading for students and scholars of media and cultural studies at all levels.
